CONTENTS

1. INTRODUCTION
1.1 Molecular mechanism of carcinogenesis 1
1.2 Oncogenes in human tumors 2
1.3 Tumor suppressor genes in human tumors 2
1.4 Expression of oncogenes and tumor suppressor genes in human breast tumor 5
1.5 Viruses and cancer 10
1.6 Human breast cancer, and it's relationship with murine mammary system 17
1.7 Tumor associated antigens 19
1.8 Biological, biochemical and immunological markers in human breast cancer 24
1.9 Some recently identified breast cancer markers 31
1.10 Male breast cancer 34

2. OBJECTIVE 38

3. MATERIALS
3.1 Patients 39
3.2 Healthy volunteers 39
3.3 Experimental animals 39
3.4 Tissues 40
3.5 Sera 41
3.6 Antibodies 41
3.7 Fine chemicals 42
3.8 Buffers 45
3.9 Reagents 47

4. METHODS
4.1 Preparation of antigens 49
4.2 Raising of rabbit antiserum to MMT 50
4.3 Absorption of the sera 50
4.4 DEAE cellulose ion-exchange chromatography 51
METHODS (CONTD.)

4.5 Sephadex gel filtration 51
4.6 Size exclusion - high performance liquid chromatography 52
4.7 Polyacrylamide gel electrophoresis (PAGE) 52
4.8 Molecular weight (MW) determination 53
4.9 Immunodiffusion 53
4.10 Affinity chromatography 54
4.11 Enzyme linked immunosorbent assay (ELISA) 54
4.12 Western blot analysis 55
4.13 Determination of temperature susceptibility of the test antigens 56
4.14 Susceptibility of the test antigens to enzymatic degradation 56
4.15 Estimation of the protein content 57

5. EXPERIMENTS AND RESULTS

5.1 Studies on murine mammary tumor 58
5.2 Studies on female breast cancer 68
5.3 Studies on male breast cancer 105

6. DISCUSSION

6.1 Studies on murine system 121
6.2 Studies on female breast tumors 123
6.3 Studies on male breast tumors 133

7. SUMMARY AND CONCLUSION 138
