LIST OF TABLES

1. Some examples of oncogenes in Human Tumors 3
2. Cloned Tumor Suppressor Genes in Human 4
3. Examples of some Human Tumor viruses 13
4. Some New Breast Cancer Markers 32
5. Immunological reactivity of the DEAE column effluents of Mouse Mammary Tumor extract 61
6. Elution of MTAA from the SDS-PAGE gel bands of MF1 64
7. Association of MTAA to Murine Mammary Tumor Virus (MuMTV) 67
8. Circulating antibodies in the sera of breast cancer patients against the DEAE column effluents of normal and tumor breast tissues. 71
9. Specificity of the HF1 reactive circulating antibodies in breast cancer patients 73
10. Purification of the BTAA reactive component from HF1 by Affinity Chromatography. 78
11. Elution of BTAA from the SDS-PAGE gel bands of HF1 83
12. Purification of BTAA from HF1 by sephadex G-100 gel filtration 86
13. Purification of BTAA through size-exclusion High Performance Liquid Chromatography (SE-HPLC) 89
14. Association of BTAA to Murine Mammary Tumor Virus (MuMTV) 93
15. Thermostability of BTAA and its susceptibility to treatment with proteolytic enzymes and neuraminidase. 94
16. Absorption of breast cancer patients' sera with fetal tissue does not remove HF_1 reactive antibodies

17. Circulating antibodies in the sera of breast cancer patients against the fetal antigen

18. Subtyping of HF_1 reactive circulating antibody in the sera of breast cancer patients

19. Circulating antibody against BTAA in the untreated and post-operated breast cancer patients.

20. Circulating antibodies in the post-operated breast cancer patients against HF_1 in relation to post-surgical period

21. Immunological relatedness of human BTAA with murine MTAA.

22. Circulating antibodies in the sera of male breast cancer patients against female breast tumor antigens

23. Circulating antibodies in the sera of male breast cancer patients against the sephadex column effluents of HF_3

24. Elution of the reactive antigen from the SDS-PAGE gel bands of HF_3-S_1

25. Association of Murine Mammary Tumor Virus with HF_3 and B_2

26. Specificity of the B_2 reactive circulating antibodies in the sera of male breast cancer patients

27. Circulating antibodies in the sera of male breast cancer patients against the murine mammary tumor antigens

28. Elution of reactive antigen from the SDS-PAGE gel bands of MF_3

29. Association of Murine Mammary Tumor Virus (MuMTV) with MF_3 and MF_3-2
