ACKNOWLEDGMENT	—
SYNOPSIS	1
Chapter I : INTRODUCTION	1
Chapter II : CRYSTALLINE ELECTRIC FIELD THEORY	
1. The Hamiltonian of a Paramagnetic Ion in Crystalline Medium	8
2. Atomic States	9
3. Group Theoretical Consideration of Levels and Terms in a Chemical Environment	10
4. Crystal Field Potential (O_h point group)	14
5. Matrix Elements of the Crystal Field Potential	18
6. Energy Levels of d^n Configuration in an Octahedral Field	21
(a) D-State Ion	22
(b) F-State Ion	24
7. Lower Symmetry Crystal Field	26
8. Spin-Orbit Coupling	29
9. The Molecular Orbital Theory	30
10. The Ligand Field Theory	35
11. Jahn-Teller Configurational Instability	38

CONTENTS (Contd.)

	<u>Page</u>
Chapter III	
A. OPTICAL PROPERTIES	43
1. d-d Band, C-T Band and Ligand-Ligand Band ..	44
2. Selection Rules	46
3. Polarization of Electronically Allowed Transition	48
B. MAGNETIC PROPERTIES	50
The Spin Hamiltonian	51
(a) Non-Degenerate Ground Level	52
(b) Degenerate Ground Level	57
Chapter IV : REVIEW OF OPTICAL AND MAGNETIC PROPERTIES OF SOME CHLORIDE COMPOUNDS	62
PART II - Our Work	
Chapter I	
Sec.1. Crystal Structure of the Host Lattice : CsCdCl ₃	69
Sec.2. Preparation and Chemical Analysis of the Samples for Experimental Studies	70
Sec.3. Magnetic Measurements	73
Sec.4. Optical Measurements	80
Chapter II : OPTICAL AND MAGNETIC STUDIES OF DIVALENT 3d⁷ ION DOPED IN CsCdCl₃	86

CONTENTS (Contd.)

	<u>Page</u>
Chapter III : OPTICAL AND MAGNETIC STUDIES OF DIVALENT $3d^6$ ION DOPED IN $CsCdCl_3$ AT LOW TEMPERATURE	110
Chapter IV : OPTICAL AND MAGNETIC STUDIES OF DIVALENT $3d^8$ ION IN $CsCdCl_3$ AT LOW TEMPERATURE	124
Chapter V : OPTICAL AND ELECTRON SPIN RESO- NANCE STUDIES OF DIVALENT $3d^9$ ION DOPED IN $CsCdCl_3$	138
Chapter VI : OPTICAL, MAGNETIC AND ELECTRON SPIN RESONANCE STUDIES OF DI- VALENT $3d^5$ ION DOPED IN $CsCdCl_3$..	143
