

CONTENTS

	Page
CHAPTER I : INTRODUCTION	1 -10
Prologue	1
Types of Investigation	2
Surface Investigation	3
Sub-surface Investigation	5
Area of Investigation	6
Previous work	8
CHAPTER II : NATURAL ENVIRONMENT	11-26
Introduction	11
Physiography of the Area	11
Land Use Pattern	13
Regional Geology	14
Gravity and seismic Features	16
Geological Setting of the Study Area	17
Hydrometeorological observations	20
Remote Sensing for Hydrogeology	23
Hydrogeological observations	24
CHAPTER III : CHEMISTRY OF GROUNDWATER	27-42
Introduction	27
Methodology	28
Chemistry of Groundwater	29
General chemical characteristics of Groundwaters	29
Seasonal variation in chemical characteristics of Groundwaters	33
Salinity of Groundwater	36
An Overview	42

CHAPTER IV : ELECTRICAL RESISTIVITY METHOD

43-53

Introduction	43
Electric Conduction in Continuous Media	44
Potential Field due to Point Source	45
Buried Current Electrode in Homogeneous, Isotropic Earth	45
Two Current Electrodes at Surface	46
The Dar Zarrouk Parameters	47
Resistivity Interpretation	49
Usefulness of Electrical Resistivity Surveys	52
Ambiguities in Electrical Resistivity Interpretation	52

CHAPTER V : DATA ANALYSIS AND INTERPRETATION

54-75

Introduction	54
Typical Geoelectric Curves	55
Spectrum of Resistivity Values	56
Dependence of Resistivity Values on Clay Content and Fractures	57
Apparent Resistivity Maps	58
Electrode spacing (AB/2) equal to 10m	58
Electrode spacing (AB/2) equal to 50m	59
Electrode spacing (AB/2) equal to 100m	59
Electrode spacing (AB/2) equal to 200m	59
Apparent Resistivity and Geoelectric Sections	60
Profile AA	60
Profile BB	60
Profile CC	61
Profile DD	61
Profile EE	61
Correlation between Electrical Resistivity Results with Well Log Results	62
Characteristics Resistivities	63
Alluvial Plains	63
Phyllite Regions	64
sand stone Regions	65
Correlation of Geoelectrical and Hydrogeological Parameters	66
Estimation of Porosity	67
Qualitative Interpretation	69
Prediction of Aquifer Characteristics	72
An Overview	74

CHAPTER VI	:	SUMMARY AND CONCLUSIONS	76-85
REFERENCES			86-97
