

LIST OF TABLES

Table
Nos.

- 2.1 : Land use pattern of Bharatpur District, Rajasthan.
- 2.2 : Gross irrigated land in the Bharatpur District, Rajasthan.
- 2.3 : Geological succession of Bharatpur District, Rajasthan (after Heron, 1953).
- 2.4 : Brief statistics for the annual rainfall recorded at eight Rain gauge stations in the Bharatpur District, Rajasthan.
- 2.5(a) : Rainfall and Drought frequencies, Bavana Rain gauge station in Bharatpur District, Rajasthan.
- 2.5(b) : Rainfall and Drought frequencies, Deed Rain gauge station in Bharatpur District, Rajasthan.
- 2.5(c) : Rainfall and Drought frequencies, Kaman Rain gauge station in Bharatpur District, Rajasthan.
- 2.5(d) : Rainfall and Drought frequencies, Nadwai Rain gauge station in Bharatpur District, Rajasthan.
- 2.5(e) : Rainfall and Drought frequencies, Nadar Rain gauge station in Bharatpur District, Rajasthan.
- 2.5(f) : Rainfall and Drought frequencies, Ropwas Rain gauge station in Bharatpur District, Rajasthan.
- 2.5(g) : Rainfall and Drought frequencies, Sewar Rain gauge station in Bharatpur District, Rajasthan.
- 2.5(h) : Rainfall and Drought frequencies, Weir Rain gauge station in Bharatpur District, Rajasthan.
- 2.6 : Criteria used to determine drought conditions in Bharatpur District, Rajasthan.
- 2.7 : Rainfall and Drought frequencies, Bharatpur District, Rajasthan.
- 2.8 : Hydrogeological conditions of Bharatpur District, Rajasthan.

- 3.0 : Hydrogeological characteristics of exploratory borewells of Bharatpur District, Rajasthan.
- 3.1 : Permissible limit for chemical constituents in groundwater for drinking purpose (after ECAFE and UNESCO, 1963).
- 3.2 : Classification of saline groundwater (after Todd, 1959)
- 3.3 : Geochemical characteristics of the groundwater from exploratory bore holes drilled in the Bharatpur District, Rajasthan.
- 3.4 : Geochemical characteristics of the groundwater for the pre-monsoon, post-monsoon and average of pre-monsoon and post-monsoon seasons for the period from 1986 to 1990 from the Bharatpur District, Rajasthan.
- 3.5 : Langellier Index (LI) and pCO_2 values for the groundwater of pre-monsoon, post-monsoon and average of pre-monsoon and post-monsoon for the period from 1986 to 1990 from the Bharatpur District, Rajasthan.
- 3.6 : Molar ratios of the groundwater for the pre-monsoon, post-monsoon and average of pre-monsoon and post-monsoon seasons for the period from 1986 to 1990 from the Bharatpur District, Rajasthan.
- 3.7 : Regression lines and Regression coefficients between electrical conductivity and various ionic concentrations of groundwater from Bharatpur District, Rajasthan.
- 5.1 : Classification of geological strata from VES data in Bharatpur District, Rajasthan.
- 5.2 : Coefficients in Archie's law which may be used when lithology of a rock is known (after Keller, 1971).
- 5.3 : Resistivity of formation, formation water resistivity, formation factor and porosity in Bharatpur District, Rajasthan.
- 5.4 : Representative Porosity ranges of sedimentary materials (after Todd, 1959).

- 5.5 : Transverse resistance (T) and longitudinal conductance (S) (Dar Zarrouk parameters) values for 10-40m and 40 - 120m alluvium columns in Bharatpur District, Rajasthan.
- 5.6 : Classification of sub-surface materials and quality of groundwater based on Dar Zarrouk parameters in Bharatpur District, Rajasthan.
- 5.7 : VES data, calculated water resistivity, formation factor and porosity of selected borewells in Bharatpur District, Rajasthan.
- 5.8 : Pumping test data and chemical data of selected borewells in Bharatpur District, Rajasthan.
- 5.9 : Total longitudinal conductance (S) and Discharge of some borewells in Bharatpur District, Rajasthan.
