

LIST OF FIGURES

Figure
Nos.

- 1.1 : Location map of Bharatpur District, Rajasthan.
- 2.1 : Drainage density map of Bharatpur District, Rajasthan.
- 2.2 : Gravity anomaly map of Aravalli region. (after Karlasam et al. 1972)
- 2.3 : Neotectonic map of north-eastern Rajasthan. (after Dassarma, 1988)
- 2.4 : Geological map of Bharatpur District, Rajasthan. (after Heron, 1955)
- 2.5 : Iso-hyetal map of Bharatpur District, Rajasthan.
- 2.6a : Departures and Cumulative departures of annual rainfall from long term station mean for the Bayana Rain gauge station in Bharatpur District.
- 2.6b : Departures and Cumulative departures of annual rainfall from long term station mean for the Deed Rain gauge station in Bharatpur District.
- 2.6c : Departures and Cumulative departures of annual rainfall from long term station mean for the Kaman Rain gauge station in Bharatpur District.
- 2.6d : Departures and Cumulative departures of annual rainfall from long term station mean for the Nadwai Rain gauge station in Bharatpur District.
- 2.6e : Departures and Cumulative departures of annual rainfall from long term station mean for the Nagar Rain gauge station in Bharatpur District.
- 2.6f : Departures and Cumulative departures of annual rainfall from long term station mean for the Sewar Rain gauge station in Bharatpur District.
- 2.6g : Departures and Cumulative departures of annual rainfall from long term station mean for the Hoodwas Rain gauge station in Bharatpur District.

- 2.6h : Departures and Cumulative departures of annual rainfall from long term station mean for the Weir Rain gauge station in Bharatpur District.
- 2.7 : Departures and Cumulative departures of annual rainfall from long term mean of Bharatpur District, Rajasthan.
- 2.8 : Thematic map of Bharatpur District, Rajasthan.
- 2.9 : Location of exploratory borewells and profiles in Bharatpur District, Rajasthan.
- 2.10a : sub-surface lithological section along the profile AA .
- 2.10b : Sub-surface lithological section along the profile BB .
- 2.10c : Sub-surface lithological section along the profile CC .
- 2.10d : Sub-surface lithological section along the profile DD .
- 2.10e : sub-surface lithological section along the profile EE .
- 2.11 : Depth to water table map of Bharatpur District, Rajasthan.
- 2.12 : Water table contour map of Bharatpur District, Rajasthan.
- 3.1 : Location of dugwells in Bharatpur District, Rajasthan.
- 3.2 : Distribution of Specific Conductance in shallow aquifer in Bharatpur District, Rajasthan.
- 3.3 : Distribution of specific Conductance of deeper aquifer in Bharatpur District, Rajasthan.
- 3.4 : Map showing higher Magnesium and Calcium concentration in the study area.
- 3.5 : Areal distribution of Nitrate in shallow aquifer in Bharatpur District, Rajasthan.

- 3.6 : Areal distribution of Nitrate in deeper aquifer in Bharatpur District, Rajasthan.
- 3.7 : Areal distribution of Fluoride in shallow aquifer in Bharatpur District, Rajasthan.
- 3.8 : Areal distribution of Fluoride in deeper aquifer in Bharatpur District, Rajasthan.
- 3.9 : Areal distribution of Nitrate, Fluoride and Electrical Conductivity of the groundwater in shallow aquifer in Bharatpur District, Rajasthan.
- 3.10 : Areal distribution of Nitrate, Fluoride and Electrical Conductivity of the groundwater in deeper aquifer in Bharatpur District, Rajasthan.
- 3.11(a & b) : Gibbs diagrams for the groundwaters from the study area.
- 3.12 : Sodium - Alkali hazards classification of the groundwater in Bharatpur District, Rajasthan.
- 3.13 : Spatial distribution of groundwater with respect to the Sodium - Alkali hazard in Bharatpur District, Rajasthan.
- 3.14(a & b) : Relation between Electrical conductivity with Sodium and sulphate concentrations of groundwater in Bharatpur District, Rajasthan.
- 3.14(c & d) : Relation between Electrical conductivity with Bicarbonate and Calcium concentrations of groundwater in Bharatpur District, Rajasthan.
- 3.14(e & f) : Relation between Electrical conductivity with Magnesium and Chloride concentrations of groundwater in Bharatpur District, Rajasthan.
- 3.15 : Relation between average Total Dissolved Solids (TDS) and average Electrical Conductivity of groundwater in Bharatpur District, Rajasthan.
- 4.1 : Illustrating the Transverse resistance (T) and the Longitudinal conductance (S).
- 4.2 : Principle of equivalence and its limits (after Kunetz, 1966)

- 4.3 : Principle of suppression and its limits (after Kunetz, 1961).
- 5.1 : Location of Vertical Electrical Sounding (VES) points. Exploratory borewells and Profiles in Bharatpur District, Rajasthan.
- 5.2 : Typical VES curves obtained along with the interpreted geoelectric sections in Bharatpur District, Rajasthan.
- 5.3 : Depth to hard rock in Bharatpur District, Rajasthan.
- 5.4 : Fence diagram of the Bharatpur District, Rajasthan.
- 5.5a : Spectrum of apparent resistivity values obtained for UH type curves alongwith the approximate upper and lower limits of resistivity values, mean of maximum and minimum values and arithmetic mean of observed values. Geoelectric sections interpreted from these curves are also shown in the figure.
- 5.5b : Spectrum of apparent resistivity values obtained for KH type curves alongwith the approximate upper and lower limits of resistivity values, mean of maximum and minimum values and arithmetic mean of observed values. Geoelectric sections interpreted from these curves are also shown in the figure.
- 5.5c : Spectrum of apparent resistivity values obtained for KQH type curves alongwith the approximate upper and lower limits of resistivity values, mean of maximum and minimum values and arithmetic mean of observed values. Geoelectric sections interpreted from these curves are also shown in the figure.
- 5.5d : Spectrum of apparent resistivity values obtained for HKH type curves alongwith the approximate upper and lower limits of resistivity values, mean of maximum and minimum values and arithmetic mean of observed values. Geoelectric sections interpreted from these curves are also shown in the figure.

- 5.6 : Models of inter granular and fracture porosity expected in type A and type C rocks.
- 5.7a : Apparent resistivity map ($AB/2 = 10m$) in Bharatpur District, Rajasthan.
- 5.7b : Apparent resistivity map ($AB/2 = 50m$) in Bharatpur District, Rajasthan.
- 5.7c : Apparent resistivity map ($AB/2 = 100m$) in Bharatpur District, Rajasthan.
- 5.7d : Apparent resistivity map ($AB/2 = 200m$) in Bharatpur District, Rajasthan.
- 5.8a : Apparent resistivity section and geoelectric section along the profile AA .
- 5.8b : Apparent resistivity section and geoelectric section along the profile BB .
- 5.8c : Apparent resistivity section and geoelectric section along the profile CC .
- 5.8d : Apparent resistivity section and geoelectric section along the profile DD .
- 5.8e : Apparent resistivity section and geoelectric section along the profile EE .
- 5.9 : Comparison of results of VES with Electric log data at some selected borewells in Bharatpur District, Rajasthan.
- 5.10 : Comparison of results of VES with geologic sections in alluvial plains in Bharatpur District, Rajasthan.
- 5.11 : Comparison of results of VES with geologic sections in phyllite region in Bharatpur District, Rajasthan.
- 5.12 : Comparison of results of VES with geologic sections in sandstone region in Bharatpur District, Rajasthan.
- 5.13 : Porosity variation in shallow zone in Bharatpur District, Rajasthan.

- 5.14 : iso-transverse resistance (R) and iso-longitudinal Conductance (S) (Dar Zarrour parameters) contours for the alluvium column 10-40m in Bharatpur district, Rajasthan.
- 5.15 : iso-transverse resistance (R) and iso-longitudinal Conductance (S) (Dar Zarrour parameters) contours for the alluvium column 40-120m in Bharatpur district, Rajasthan.
- 5.16 : Relation of porosity and permeability to formation resistivity factor. Nacatoch sand, Bellevue, LA. (after Archie, 1942).
- 5.17 : Relation of hydraulic conductivity to formation factor (after Croft, 1971).
- 5.18 : Relationship between field Hydraulic conductivity and Specific capacity wit aquifer Resistivity in Bharatpur District, Rajasthan.
- 5.19 : Relationship between Porosity and Hydraulic conductivity with Formation factor in selected borewells in Bharatpur District, Rajasthan.
- 5.20 : Relationship between Total longitudinal conductance (S) in mhos with Yield (Gph) in Bharatpur District, Rajasthan.
