

# CONTENTS

## **CHAPTER1. Introduction**

1.1 General aspects about the Sun

1.2 Solar activity

1.3 Solar Cycle

1.4 Solar Wind

1.5 Solar Energetic Particles (SEPs)

1.6 Solar Flares

1.7 Solar Prominences (Filaments)

1.7.1 The prominence fine structure

1.7.2 History of Solar Prominences Research

1.7.3 Classification of Solar prominences

1.7.4 Active prominences

1.7.5 Observed Prominence Type

1.7.6 Formation & Models of Prominences

1.7.7 Current understanding about Prominence Eruptions

1.8 Coronal Mass Ejections (CMEs)

1.8.1 Structure of CMEs

1.8.2 Models of CMEs

1.9 Prominence-CMEs relationship

## **CHAPTER2. Instrumentation, Observations and Data Reduction**

2.1 The Solar and Heliospheric Observatory (SOHO)

A. SOHO/MDI

B. SOHO/EIT

C. SOHO/LASCO

2.2 Nobeyama Radioheliograph

## **CHAPTER3. Twisted Eruptive Prominence of 7 Dec 2001 Associated With CMEs**

3.1 Introduction

3.2 Observations

3.3 Morphology and Kinematics

3.3.1 Chronology of event

3.3.2 Spatial and Temporal correlation

3.3.3 Prominence Kinematics

3.4 Conclusions

## **CHAPTER4. A Statistical Study of Prominence Eruptions And Coronal Mass Ejections during 2002-2008**

4.1 Introduction

4.2. Data Selection

4.3. Statistical Properties of Prominence Events

4.3.1 Definitions of Eruptive (Radial) and Active (Transverse) Prominences

4.3.2 Difference between Eruptive (R) and Active (T) prominences

4.3.2.1 Maximum Height of EPs and APs

4.3.2.2 Prominence Velocities :( Radial velocities of EPs and APs)

4.4 Relation between Prominence and CMEs Eruptions

4.4.1 Latitudes

4.4.2 Timing and Spatial Relationship between CMEs and Prominence  
events

4.4.3 Core association

4.5 Discussion and conclusions

## **CHAPTER5. On Some Properties of Prominence Eruptions And the Associated CMEs in Solar Cycle 23**

5.1 Introduction

5.2 Data and Analysis

5.3 Some properties of prominences and the associated CMEs

5.3.1 Speed of prominence and the associated CMEs

5.3.2 Width of PEs and the associated CMEs

5.3.3 Latitudes of PEs and the associated CMEs

5.3.4 Acceleration of PEs and the associated CMEs

5.3.5 Solar cycle variations of PEs and associated CMEs

5.4 Discussion and conclusions

## **CHAPTER-6 Future and Summary Scope**

6.1 Summary/Conclusions

6.2 Future Scope
