ACKNOWLEDGEMENTS

"Obstacles cannot crush me, every obstacle yields to a stern resolve"  Leonardo Da Vinci

I wish to convey my deep gratitude to my research supervisor Dr Sandhya Rane for accepting me as a student and for her guidance and encouragement during my research work all through these years.

It has been an extremely enriching and exciting experience to work with Dr Subhash Padhye who has been my mentor and philosopher since my childhood. Opening this world of Drug Design was like a “Pandora’s box“. It was full of opportunities for a biochemistry student like me to learn bioinorganic chemistry and to some extent understand the thought processes behind synthetic chemistry. I thank him for teaching me the profound lesson of life that every man has his own destiny, the only imperative is to follow it and that our real blessings often appear to us in the form of pains, losses and disappointments but the way to deal with them is to overcome them with perseverance and patience.

I sincerely thank Dr G.C Mishra (Director of National Center for Cell Science, Pune) for permitting me to work at NCCS lab, Dr Gopal Kundu (NCCS, Pune) for his guidance and training extended during the work carried out at NCCS, Dr Christopher J. Newton (University of Hull, UK) for his help during the brief research period spent at University of Hull and Dr. Fazlul Sarkar (Wayne State Medical School, Michigan, USA) for the encouragement and support in getting some crucial data in the final phase my research.

I am thankful to various Heads of the Department. Of Chemistry, Pune University., during my research tenure, which include Professors S.R. Gadre, R.S. Mali, B.S.M. Rao, for their support. I
am grateful to my biochemistry teachers Dr Shobhana Bhide (Head, Biochemistry Division), Dr Meena Karve, and Dr Sushama Sabharwal for their instructions and well wishes.

I take this opportunity to thank all the administrative and technical staff at Chemistry Department and NCCS for their friendship and assistance. I am greatly indebted to a large number of my friends at Chemistry Department who belonged to the Drug Design and Molecular Medicine Research Group which include: Dr Anupa Kumbhar, Dr Prasad Kulkarni, Dr Pallavi Kulkarni, Dr Uday Sandbhor, Dr Nikhil Gokhale, Dr Dilip Saha, Dr Sabari Dutta, Dr Jayendra Patole and Dr Zahra Afrasiabi. I would also like to acknowledge the immense help received from my colleagues in the present research group: Vivek, Shirisha, Dipti, Vinita, Sommai, Vishal and Ajit for making this journey enjoyable and memorable. Special thanks are due to my friend Mukti Shah for her love and friendship and Ms. Fakhara Ahmad for some of the biological measurements.

I am grateful to my parents-in-law Mr Avinash and Mrs Usha Adsule for their active support, love and blessings and my brother-in-law Devdutta and his wife Rashmi for their affection and for always being there. My heartfelt love and gratitude to the following people who made this journey possible:

MY MENTORS AND HEROES
MY LOVING PARENTS
AND ABOVE ALL
FOR PASSING ON THEIR GENES...

MY HUSBAND AMOL AND SON ADITYA
FOR UNCONDITIONAL LOVE AND TOLERANCE

MY BROTHER SIDDHARTH
FOR LOVE AND HUMOUR

Finally, the financial help in the form of Senior Research Fellowship from Council of Scientific and Industrial Research, New Delhi and a visitorship award from the British Council, Mumbai Division is gratefully acknowledged.

Ms. Shreelekha Padhye
Research Student
