The investigation reported in this thesis has been conducted in the Histophysiology laboratory, Department of Zoology, University of Calcutta, Calcutta, India.

It is a privilege to acknowledge my deep indebtedness to my teacher Professor Asok Ghosh, Sir Nilratan Sircar Professor and Head, Department of Zoology, University of Calcutta, for his guidance and encouragement throughout the course of this work.

I am indebted to Professor D. N. Ganguly, Ex-Head of the Department of Zoology, University of Calcutta for providing all the facilities at my disposal to pursue the research in the department.

My thankful recognition is due to Dr. B. R. Maiti, Lecturer, Department of Zoology, University of Calcutta for photomicrography and needful suggestions.

To Miss Dipti Ghosh, I am specially grateful for her sustained cooperation in various phases of this research project.
I must express my thankfulness to: Dr. P. K. Mondal, Lecturer, Department of Zoology, City College, Calcutta for drawings; Miss Chandrima Shah, Research fellow, Indian Institute of Experimental Medicine, Calcutta for photomicrographs; Mr. R. Bandyopadhyay for scrutiny of the statistical analyses; Mr. R. Sur, Research fellow, Department of Zoology, University of Calcutta for offering typing facility.

Warm thanks are extended to all my co-workers for their stimulating collaboration. I would like to give a special thanks to Mr. A. Sahu for his kind help in checking the final text.

The typographical assistance of Mr. Jahar Ganguly is also sincerely acknowledged.

The project was supported by a Junior Research Fellowship awarded to the author from the University Grant's Commission, Government of India.
