

Contents

Chapter 1: Introduction.....	8-24
Chapter 2: Experimental methodology.....	25-27
Chapter 3: Synthesis and Characterization of Transition Metal Complexes Using a Pyridine-Pyrazole Based N₈O-type Ligand and Their Properties....	28-44
Abstract.....	28
3.1 Introduction.....	29
3.2 Results and Discussions.....	29-36
3.3 Magnetic Studies.....	36-38
3.4 Luminescence behaviour and sensing properties.....	38-39
3.5 Conclusions.....	39
3.6 Experimental Section.....	39-42
3.7 References.....	42-43
Chapter 4: Metal-Directed Formation of Molecular Helix, Cage and Grid Using an Asymmetric Pyridine-Pyrazole Based Bis-Chelating Ligand and Properties.....	44-65
Abstract.....	44
4.1 Introduction.....	45
4.2 Results and Discussions.....	46-53
4.2.1 Synthesis and Crystal Structure.....	46-52
4.2.2 Conformation vs Coordination Mode.....	53
4.3 Magnetic Studies.....	54-55
4.4 Solid State CD Analysis of Complexes 2 and 3.....	55-56
4.5 Conclusions.....	56
4.6 Experimental Section.....	57-61
4.7 References.....	61-63
Chapter 5: Construction of Polynuclear Lanthanide (Ln= Gd, Tb, Dy, Ho, Er and Yb) Cage Complexes using novel Pyridine-Pyrazole based ligands: Versatile Molecular Topologies, Luminescent Property and SMM behaviour.....	64-87
.....	64-87
Abstract.....	64
5.1 Introduction.....	65-66
5.2 Results and Discussions.....	66-71
5.3 Luminescent Property.....	71-72

5.4 Magnetic Studies.....	72-80
5.5 Conclusions.....	80
5.6 Experimental Section.....	81-84
5.7 References.....	84-87

Chapter 6: A Comprehensive Study of Twelve H₃BPPC-based Lanthanide Complexes Showing an Unprecedented Variable Nuclearity and Their Spectroscopic and Magnetic Properties.....88-114

Abstract.....	88
6.1 Introduction.....	89-90
6.2 Results and Discussions.....	91-99
6.3 Chirality and CD Spectra.....	99-100
6.4 Magnetic Studies.....	101-106
6.5 Conclusions.....	106
6.6 Expeimental Section.....	107-111
6.7 References.....	112-114

Chapter 7: Designing Functional Metal–Organic Frameworks by Imparting a Hexanuclear Copper-based Secondary Building Unit Specific Properties: Structural Correlation With Magnetic and Photocatalytic Activity.....115-134

Abstract.....	115
7.1 Introduction.....	116-117
7.2 Results and Discussions.....	117-121
7.3 Thermogravimetric analysis of MOFs 1-3.....	121-122
7.4 Magnetic Studies.....	122-123
7.5 Photocatalytic Activity.....	124-128
7.6 Conclusions.....	128
7.7 Expeimental Section.....	128-131
7.8 References.....	132-134

Chapter 8: Pyrazole Based Two Isostructural Cu₃₀ Cages and Their Magnetic and Photocatalytic Properties.....135-148

Abstract.....	135
8.1 Introduction.....	136
8.2 Results and Discussions.....	136-139
8.3 Magnetic Studies.....	139-140
8.4 Photocatalytic Activity.....	140-142
8.5 Thermal and Chemical stability.....	143
8.6 Experimental Section.....	143-145
8.7 Conclusions.....	146
8.8 References.....	146-148

Chapter 9: Synthesis, Crystal Structure and Optical Properties of a Naphthylbisimide-Ni Complex: A Framework on TiO₂ for Visible Light H₂ Production.....149-163

Abstract.....	149
9.1 Introduction.....	150-151
9.2 Results and Discussions.....	151-157
9.2.1 Synthesis.....	151
9.2.2 IR, PXRD and UV-Vis spectra.....	152-154
9.2.3 Photocatalytic hydrogen production.....	154-157
9.3 Conclusions.....	157
9.4 Experimental section.....	158-161
9.5 References.....	161-163

Chapter 10: MOF-derived Superior CoO_x/TiO₂ Nanocomposites: First Example of *p-n* diode-type Photocatalysts Showing Manifold Enhanced H₂ Production from Water.....164-187

Abstract.....	164
10.1 Introduction.....	165-166
10.2 Results and Discussions.....	166-170
10.2.1 Synthesis.....	166
10.2.2 Description of crystal structures.....	167-168
10.2.3 TGA, Gas adsorption and PXRD study.....	168-170
10.3 Physical properties of the photocatalyst nanocomposites.....	170-180
10.4 Conclusions.....	180
10.5 Experimental Section.....	181-185
10.6 References.....	186-187

Chapter 11: A Novel Gel-based Technique for Controlled Synthesis of Silver Nanoparticles Showing Efficient Catalysis and Dual Colorimetric Sensing of Hg(II) and Cr(VI) ions.....188

Abstract.....	188
11.1 Introduction.....	189-191
11.2 Results and Discussions.....	191-200
11.3 Catalytic Studies.....	200-202
11.4 Colorimetric sensing of Hg ²⁺ and Cr ⁶⁺ reduction as well as adsorption.....	203-206
11.5 Conclusions.....	206
11.6 Experimental Section.....	206-208
11.5 References.....	208-210
List of Publications.....	211-213
