

## Acknowledgement

During my research tenure to obtain my Ph.D. I have come across some encouraging and inspiring people to whom I owe a lot.

I would like to thank to my Ph.D. supervisor, Professor Susanta Lahiri, Chemical Sciences Division, Saha Institute of Nuclear Physics, Kolkata, for supporting me during these past six years. Prof. Lahiri is someone you will never forget once you work with him. Under his guidance I successfully overcame many difficulties and learned a lot.

I am grateful to the University Grants Commission (UGC) for providing me necessary fellowship for five years and Saha Institute of Nuclear Physics (SINP) for last one year and providing research facility to carry out my Ph.D. work.

It gives me great pleasure to express my heartfelt gratitude towards my present and past laboratory mates who have made it so easy to work in the laboratory by providing me with an utmost friendly, humorous and amicable atmosphere to work in.

I take this opportunity to thank all the members of Chemical Sciences Division, SINP for their kind cooperation and help in total Ph.D. period.

I wish to take this as a great opportunity to express my thanks to target laboratory VECC, Kolkata for preparing targets. Thanks to pelletron staff of the BARC-TIFR pelletron beam at Tata Institute of Fundamental Research (TIFR), Mumbai and members of accelerator beam at Variable Energy Cyclotron Centre (VECC), Kolkata for providing me the beam line for the radiochemical experiment.

I would also like to thank some people from early days of my research tenure. Jaganath Mandal, Saktipada Karmakar, Khagen Saren, Subhas Singhababu and Dr. Dilip Maji who were the source of inspiration for me in my early days and who taught me many things.

I would also like to extend huge, warm thanks to my good friends (too many to list here but you know who you are!) for their valuable help and support that I needed.

I gratefully acknowledge Dr. Swadesh Mandal, Dr. Subhajit Karmakar and Prof. Supratic Chakraborty who were always beside me during the happy and hard moments to push me and motivate me. I can see the good shape of my thesis because of their constant help, valuable suggestions, encouragement and moral support.

I am grateful to my hard-working parents and my cousins Budhadeb and Sidhartha and their families for their faith and support. My parents have sacrificed their lives for me and provided care and inspiration throughout my research work and lifting me uphill this phase of life.

Last but not least, I would like to give my special thanks to my loving wife Papiya for her enormous patience and unconditional love. There are no words to convey how much I love her. Finally, my special acknowledgement goes to the newest additions to my family, Aparajit, my son.
