Acknowledgements	i-ii
Dedication	iii-iv
List of frequently used abbreviation	v-vi
Chapter-1	1-8
1 Introduction	1
1.1 Prelude	1
1.2 The fourth period elements and their importance	1
1.2.1 Potassium (K)	2
1.2.2 Cobalt (Co)	2
1.2.3 Copper (Cu)	3
1.2.4 Germanium (Ge)	3
1.2.5 Arsenic (As)	4
1.2.6 Selenium (Se)	4
1.3 Scope and aim of the thesis	5
References	5
Chapter-2	9-29
2 Materials, Methods & Experimental Techniques	9
2.1 Chemicals and Reagents	9
2.2 Standard Reference Materials	10
2.3 Chemical procedure	10
2.3.1 Sample preparation	10
2.3.2 Microwave digestion	10
2.4 Instrumentations	11

2.4.1 Analytical techniques	11
2.4.2 Inductively coupled plasma optical emission spectrometry (ICP-OES)	12
2.4.2.1 Introduction	12
2.4.2.2 Why ICP-OES?	12
2.4.2.3 ICP-OES instrumentation	13
2.4.2.4 Sample introduction	13
2.4.2.5 Liquid Sample introduction	14
2.4.2.6 Concentric Nebulizer	14
2.4.2.7 Ultrasonic Nebulizer	15
2.4.2.8 Spray Chamber	15
2.4.2.9 Gaseous sample introduction	16
2.4.2.10 Hydride Generation	16
2.4.2.11 Solid Sample Introduction	16
2.4.2.12 The ICP torch and Plasma	16
2.4.2.13 ICP Process	18
2.4.2.14 Collection and Detection Methods of Emission	18
2.4.3 Wavelength dispersive X-ray fluorescence (WDXRF)	19
2.4.3.1 Introduction	19
2.4.3.2 Instrumentation and data handling	19
2.4.3.3 Nuclear techniques	20
2.4.3.3.1 HPGe Semiconductor Detector	21
2.4.3.3.1.1 Introduction	21
2.4.3.3.1.2 n and p-type detectors	21
2.4.3.3.1.3 Instrumentation and activity measurement	23

2.4.4 Saha Institute of Nuclear Physics Compton suppressor spectrometry (SINP-CSS)	24
2.4.4.1 Introduction	24
2.4.4.2 Compton suppression procedure	25
2.4.4.3 SINP-CSS instrumentations	25
References	26
Chapter-3	30-49
3 Determination of Potassium	30
3.1 An Improved Non-destructive Method of Potassium Determination	30
3.1.1 Experimental	34
3.1.1.1 ICP-OES analysis	35
3.1.1.2 WDXRF analysis	37
3.1.2 Results and discussion	37
3.1.3 Conclusion	40
3.2 Determination of potassium in common vegetables in India using Compton suppressed gamma-ray spectroscopy	40
3.2.1 Experimental	41
3.2.1.1 Vegetable Sample preparation for analysis	41
3.2.1.2 Quantitative analysis	41
3.2.2 Results and discussion	41
3.2.3 Conclusion	43
References	43

Chapter-4	50-65
4 Separation of ^{61}Cu from alpha particle irradiated cobalt target by trioctylamine	50
4.1 Experimental	54
4.1.1 Chemicals and reagents	54
4.1.2 Irradiation	54
4.1.3 Radiochemical separation	55
4.2 Results and discussion	55
4.3 Conclusion	58
References	58
Chapter-5	66-68
5 Revisiting the classical chemical data: solubility of GeO_2	66
5.1 Experimental	66
5.1.1 Chemicals and Solution preparation	66
5.1.2 Instrumentation	66
5.2 Results	67
5.3 Conclusion	68
References	68
Chapter-6	69-85
6 Production and separation of no-carrier-added ^{73}As and ^{75}Se from ^7Li irradiated germanium oxide target	69
6.1 Experimental	74
6.1.1 Chemicals and reagents	74
6.1.2 GeO_2 target preparation	74
6.1.3 Irradiation and gamma spectrometry	75

6.1.4 Chemical procedure: Microwave digestion	76
6.1.5 Radiochemical separation	77
6.1.6 ICP-OES analysis	77
6.2 Results and discussion	78
6.3 Conclusion	81
References	81
Chapter-7	86-103
7 Uptake Behaviour and Interdependence Study of Arsenic and Selenium in Mung Bean by Inductively Coupled Plasma Optical Emission Spectrometry	86
7.1 Experimental	90
7.1.1 Reagents and samples	90
7.1.2 Plantation of Mung bean (<i>V. radiata</i>) seeds and growth	90
7.1.3 Chemical procedure: Microwave digestion	92
7.1.4 ICP-OES analysis	92
7.2 Results and discussion	92
7.3 Conclusion	94
References	94
Chapter-8	104-106
8 Summary	104
Annexure-1	107-108
List of Publications in International Journals	107
Conference Publications	108
