ACKNOWLEDGEMENT

Verbose style is perhaps little enough to unfold one’s ribbon of gratitude. Yet, many an occasion appears when this gratitude finds no alternative but to avail itself of such a printed pavement acknowledging its homage with inexplicable sentiment for far and near well-wishers. Words seem to be inadequate to epitomize the love, care, guidance, inspiration, good wishes and silent blessings that I received from all towards completion of this work.

First of all, I ascribe all glory to the gracious God for his heartfelt benedictions and silent blessings which always acts as my savoir in the face of all sorts of peril and paved the path of my life. It is the time to acknowledge my late father, whom I lost in my childhood and my late grandma, who brought me up. Their unvoiced blessings have always been the underlying that aided me in surpassing all sorts of hindrances throughout my life.

Mere words can never suffice to express the sense of my indebtedness and heartfelt gratitude to my honorable supervisor, Dr. Subhas Chandra Kole, Associate Professor, Department of Agricultural Chemistry and Soil Science, Bidhan Chandra Krishi Viswavidyalaya, for his diligent efforts, invaluable and ceaseless guidance, constant encouragement, constructive criticism and suggestion in planning and carrying out the research work, which can never be forgotten. His close monitoring, and encouragement made the work complete with perfection. I also tender my gratitude to my Associate supervisor Dr. Sagarmoy Ghosh, Assistant Professor, Department of Microbiology, University of Calcutta. His priceless suggestions and innovative ideas helped me in the execution of my research work.

I feel immense pleasure to acknowledge my sincere regards and gratefulness to Prof. Supradip Sarkar, CPI of the project “Arsenic in Food-Chain: Cause, Effect and Mitigation” under Component-4 of NAIP for his guidance, active co-operation and constant mental support from the very beginning of my joining in this research programme. He is the person whom I found always whenever I need him. I express my indebtedness and heartfelt gratitude especially to Dr. Kallol Bhattacharyya, Associate Professor for his innovative ideas, affectionate guidance and constant inspiration during the entire research period. I am ever indebted to him. I would like to give special thanks to Dr. Somnath Bhattacharyya, Associate Professor & Head, Department of Genetics, for his valuable advice, encouragement and providing the necessary laboratory facilities.

I would like to convey my respect to Dr. Saroj Kanti Das and Dr. Prajna Mondal from Acharya Prafulla Chandra College for making me eligible for carrying out research in
the subject Microbiology. Only because of their love and support, I found the strength for
doing this doctoral programme.

The financial assistance that I received from the project “Arsenic in Food-Chain: Cause, Effect and Mitigation” under Component-4 of NAIP, of World Bank through Indian Council Of Agricultural Research (ICAR) is gratefully acknowledged. I am also obliged to Niche Area of Excellence and all members of Arsenic Research Laboratory, Bidhan Chandra Krishi Viswavidyalaya for facilitating my research work and access to information. I wish to express my sincere feelings and special thanks to the villagers of arsenic affected areas of Nadia district, where I have worked.

I am ebulliently excited at having this opportunity to express my heartfelt thanks to all the teachers, students, stuffs of the institute Bidhan Chandra Krishi Viswavidyalaya. Not being a core student of Agriculture, I came to this institute for carrying out my research programme with lots of anxiety, but, even not for a single occasion they don’t make me feel that I am not belonging from this University. Their affectionate care, love, support and blessing make me feel the homely environment and inspired me for doing better research.

I wish to express my heartiest thanks to Rahaman da who give me an enjoyable environment while doing this job, along with Bhudeb da, Rinku da, Biswanath da, Tapan da Gain da, Sougata da, Raju da for extending their active cooperation whenever needed.

Special thanks are extended to my respected seniors namely, Tapas da, Bishwajit Sinha da, Bishwajit Basu da, Anirban da, Nihar da, Pavel da, Sanchita di, Mitali Kundu di, Mitali Chatterjee di, Nadira di and Amrita di for extending help and encouragement during the Ph. D. research programme. A plethora of thanks to my friend and juniors Prakash, Arkobani, Jajati, Monotosh, Riyajul, Sandip and Amit whose loving company kept me gay and lively throughout the tenure of my Ph.D life.

I pay my sincerest respect and regards to the man of my life whose constant support and inspiration are the secrets of my success.

Last but not the least; I pledge my heartfelt regards, love and deepest sense of appreciation to my “Mother” whose inspiration, encouragement, sacrifice and good wishes are the source of my strength and to simply say, she is the inspiration behind whatever success I have achieved so far in my life.
