First and foremost I would like to express my sincerest gratitude to my Ph. D. supervisor, Prof. Asimananda Goswami, who has supported me throughout my thesis with his enthusiasm, inspiration, patience and knowledge. Throughout my thesis-writing period, he provided encouragement, valuable discussions and lots of good ideas. I am really thankful to him for his clear and enthusiastic discussions and suggestions which helped me to find my firm grounding in the research problem. Without his dedicated supervision, it would have never been possible to complete this thesis. In particular, I am grateful to Prof. Goswami for enlightening me the first glance of research.

I gratefully acknowledge Dr. Rajarshi Raut (Rajarshi da) of UGC-DAE-CSR, Kolkata centre for his fruitful suggestions and enormous help during data analysis. He has been available whenever I need any suggestions to improve my wisdom about the subject. I would also like to thank all members of the Nuclear Physics division, Saha Institute of Nuclear Physics (SINP) for their encouragement and gracious support. Prof. Maitree Saha Sarkar, Prof. Subinit Roy and Prof. Chhanda Samanta who taught us the nuclear physics in the Post M. Sc course have been acknowledged greatly for introducing me about the versatility of subject and also for their caring and student friendly demeanor. I would like to thank all my INGA collaborators for their help and support. Special thanks are due to Dr. Gopal Mukherjee of Variable Energy Cyclotron Centre (VECC) and Dr. R. Palit of Tata Institute of Fundamental Research (TIFR) for their assistance which helped me to boost my understanding about the interpretation of experimental results. The effort of BARC-TIFR Pelletron staffs for providing the uninterrupted beam during experiments has been appreciated greatly.
I am grateful to the directors of SINP, Profs. M. K. Sanyal, B. K. Chakroborty and A. K. Mohanty, for helping me for all the necessary support a doctoral student need and also to the Heads of the Nuclear Physics Division, Profs. P. Banerjee, P. Basu and M. Saha Sarkar, for providing me the excellent working atmosphere and necessary support. A substantial amount of time during my Ph.D. life is spent with friends. The excellent support and encouragement received from Sudatta di, Mandira di, Mukesh da, Shinjinee di, Hari da, Santosh da, Abhijit da, Anisur da, Dibya di, Biswarup, Mayukh, Moin, Atanu, Jayati, Sangita and Sajad are gratefully acknowledged. Special thanks to Sudatta di and Abhijit da who provided invaluable suggestions during the period of data analysis.

The financial supports obtained from the Council of Scientific and Industrial Research (CSIR), India under Contract No. 09/489(0083)/2010-EMR-1 and the authority of my institution during the course of my Ph.D. have been acknowledged with thanks.

I am thankful to the Principal, Dum Dum Motijheel College and all faculty members of the Department of Physics for their constant support, enthusiasm and inspiration throughout the thesis-writing period. This acknowledgement would be incomplete without mentioning my family. I am extremely grateful to my parents, brother and rest of my family members. I do appreciate the encouragement and unlimited support that they have given to me during my study.

Lastly, but certainly not least, I would like to express my sincere thanks to all the well wishers of SINP and elsewhere who showed interest in my work and gave me support which helped me to perform and understand my work in a better way.

I sincerely apologise for unintended omission of any name from the above list of acknowledgment.

Subhendu Rajbanshi
