## Chapter I  Introduction:

1.1 Context of the Study
1.2 Sustainable Urban Growth and Eco-system Management
1.3 Kolkata and East Kolkata Wetlands—nature of eco-integration
   1.3.1 Some relevant facts about Kolkata
   1.3.2 Some relevant facts about EKW
   1.3.3 Nature of mutual dependence
1.4 Research Question, Key Issues and Methodology
   1.4.1 Research Questions
   1.4.2 Key issues
   1.4.3 Methodology
1.5 Chapter Plan

## Chapter II  Relevant Literature: A Brief Review

2.1 Introduction
2.2 Peri-urban Interface (PUI)
   2.2.1 Importance of fringe to sustain cities
   2.2.2 Cyclical flow of matter and energy – from source to sink
   2.2.3 Biodiversity & eco-system functioning for resilience
2.3 Change in land-use and livelihood pattern
   2.3.1 Livelihood as key to sustainability
   2.3.2 Country experiences: sustainable peri-urban livelihood
   2.3.3 Vulnerability caused by change in landscape
   2.3.4 Integrated strategy combining land-use and livelihood
2.4 Payment for eco-system services (PES)
   2.4.1 Eco-system Services in urban areas
   2.4.2 Problem in recognition & Valuation
   2.4.3 Payment for eco-system services
   2.4.4 Potential buyers- undervaluation
2.5 Managing wastewater and Constructed wetlands
   2.5.1 Challenges for treating wastewater – constructed wetlands
   2.5.2 Country experiences
   2.5.3 EKW as tutorial eco-system
Chapter III  Kolkata’s Urban Development and Emergence of

East Kolkata Wetlands

3.1 Preface
3.2 Evolution of Wastewater Disposal System of Kolkata
   3.2.1 Wetlands in the East: The Earliest Account
   3.2.2 The Drainage problem and development of sewage disposal system
   3.2.3 Decay of river Bidyadhari and wetlands as a savior
      Emergence of a new urban eco-system
      Sewage fed Fisheries
   3.2.4 Canal Network: Disposal of wastewater into wetlands
3.3 Wastewater Aquaculture: An Instance of Unique Complementarity
   3.3.1 Natural Conditions and Natural Treatment
      Climate
      Shallow ponds
      Adequate Sunshine
      Bio-filters
   3.3.2 Process Correspondence: Crucial role of sewage fed fisheries
      Fish as Ecological Manipulator
      Wastewater Aquaculture
3.4 Traditional Knowledge based Livelihood Practices
   3.4.1 Preparation of Pond Bed
   3.4.2 Managing Wastewater Supply
   3.4.3 Embankment Protection:
   3.4.4 Using Ecological indicators:
   3.4.5 Supply of Spawns
   3.4.6 Stages of Fish cultivation:
   3.4.7 Preparing pond for second or third round
   3.4.8 Optimizing Nutrient Sharing
   3.4.9 Resource Recovery Practices
3.5 Mutual Dependence - Kolkata and EKW
   3.5.1 Wise use of Wetlands - RAMSAR
   3.5.2 Complementary Eco-systems
3.6 Overall Assessment

Appendix 3.A.1  Photographs from the field

Chapter IV  Urban Encroachment and Land-use Change in

East Kolkata Wetlands

4.1 Introduction
4.2 Eastbound Growth of the City of Kolkata
   4.2.1 Population pressure in and around Kolkata
   4.2.2 Enhanced connectivity and Urban Encroachment
4.3 Population Pressure on East Kolkata Wetlands
   4.3.1 Change in Population density
   4.3.2 Distribution of water bodies according to sizes
4.4 Change in Land-use Pattern
   4.4.1 Changes in the immediate vicinity of EKW
   4.4.2 Reduction Water Coverage
   4.4.3 Change within RAMSAR area
4.5 Induced Change in the Eco-system
   4.5.1 Change in Topography
   4.5.2 Change in Livelihood Profile
   4.5.3 Threat to Sustainability
       Obstructed wastewater flow & Increased Siltation rate
       Over-dredging of wastewater canals and altered natural gradient
       Changing signature of bio-chemical components in sewage water
       Threat from alien species in sewage fed ponds
4.6 Need for further investigation

Appendix 4.A.1 Photographs from the field

Chapter V Vocational Transition: Voices from the Field

5.1 Background
5.2 Observations from Livelihood survey
5.3 Listing of Vocation-type: Time Diary
   5.3.1 Why Time Diary?
   5.3.2 Sample Selection
   5.3.3 Data transcription - From Diary to Data
   5.3.4 Coding of Vocations
5.4 Data: Description, Exploration and Regression – Results from time diary
   5.4.1 Sample Composition
   5.4.2 Exploration of Vocational Choice
   5.4.3 Exploration by Work Intensity
   5.4.4 Regression Analysis
   5.4.5 Vocational Mixing within Fisheries
   5.4.6 Need for Further Investigation
5.5 Household Survey:
   5.5.1 Designing Questionnaire
   5.5.2 Sample composition
   5.5.3 Vocation switching
       Who will shift?
       What will be the likely process of shifting?
       Why someone, in spite of all opportunities, might not be inclined to switch?
   5.5.4 Regression Results
5.6 Assessment of Sustainability

Appendix 5.A.1 A Time Use Survey on the Households Residing in East Kolkata Wetlands
Appendix 5.A.2 Vocation code list
Appendix 5.A.3 Household Survey (East Kolkata Wetlands)
### Chapter VI  Eco-services lost: An assessment of Opportunity Cost  142-159

6.1  Prologue

6.2  Enumerable benefits

   6.2.1  Cost Saving from Sewage Treatment

   *Present Arrangements for Sewage Management in Kolkata:*
   - Cost of sewage treatment at STP
   - Annualized Capital Cost
   - Annual O&M Cost
   - Financial Provision from KMC

   6.2.2  Benefits Related to Food-chain and Livelihood

6.3  Non-enumerable Benefits derived from EKW

   6.3.1  Flood Control

   6.3.2  Carbon Sequestration

   6.3.3  Lungs of Kolkata

   6.3.4  Natural Laboratory

   6.3.5  Open Space and Recreation

6.4  Push and Pull Factors: a SWOT analysis

6.5  Concluding concerns

---

### Chapter VII  Intervention Strategies: Assessment of Efficacy  160-171

7.1  Introduction

7.2  Legal Initiatives to protect EKW

   7.2.1  Pre-RAMAR: Efforts in appreciation of uniqueness

   7.2.2  Post-RAMSAR: Where do we really stand?

7.3  Residents’ Perception

7.4  A story of co-ordination failure

---

### Chapter VIII  Conclusion  172-189

8.1  Major findings once more

8.2  Lessons from other studies

8.3  Designing of a comprehensive land-use policy

8.4  Direction of Future Research

---
