LIST OF ILLUSTRATIONS

Illustration 3.1  EKW in the early Nineteenth Century (1827)
Illustration 3.2  Algae Bacteria Symbiosis
Illustration 3.3  Fish as an Ecological Manipulator
Illustration 3.4  6-8 Inch deep Channel Excavated in Pond Bed
Illustration 3.5  Air Circulation in water using ‘Moi’
Illustration 3.6  Managing Inlet & Outlet
Illustration 3.7  Embankment using water hyacinth
Illustration 3.8  Partitioning Scheme for the water body
Illustration 4.1  Canal Over-dredging and Gradient Mismatch

LIST OF CHARTS

Chart 1.1  Mutual Dependence: Kolkata & EKW
Chart 3.1  Correspondence between the processes of sewage treatment and fish production
Chart 3.2  Stages of Pond Preparation
Chart 3.3  Complementarity between Kolkata and East Kolkata Wetlands
Chart 3.4  Resource Recovery Practices in EKW
Chart 5.1  Activity Classification
Chart 5.2  Vocation type: a schematic presentation
Chart 5.3  Switching tendency from Fishery
Chart 7.1  Residents’ Perception
Chart 7.2  Different Stakeholders of EKW
Chart 8.1  Land Sue Patterns – Determinants and Impacts

LIST OF GRAPHS

Graph 4.1  Mouza-wise Average Size of Water Body (in sq. m.)
Graph 5.1  Period of Engagement in Current Vocation (for General Vocation)
Graph 5.2  Time Use Pattern for working members by age, sex and education
Graph 5.3  Box Plots of working population by age, sex and education
Graph 5.4A  Intensity of work across vocation type by age
Graph 5.4B  Intensity of work across vocation type by sex
Graph 5.4C  Intensity of work across vocation type by level of education
Graph 5.5  Mixing of Vocations in EKW
Graph 5.6  Pattern of Vocation Switching across Traditional Activities
Graph 5.7  Stacked Venn of Vocation Retention
