Summary V-VI

Chapter 1: Introduction 1-50

A. Genetic basis of viral carcinogenesis 2-12
   1.1 Tumor Causing viruses 2
   1.2 RNA & DNA viruses: Mode of Carcinogenesis 4
   1.3 Host-immune response against viral infection 9
   1.4 Oncogenic viral strategies for host immune-evasion 10
   1.5 Inflammatory response and viral carcinogenesis: the enemy within 11

B. Uterine Cervical Carcinogenesis: Role of High Risk Human Papillomavirus (HR HPV) 12-48
   1.6 HR HPVs: Prevalence in population 12
   1.7 Association of HLA and IL-1 polymorphism with persistent HR HPV infection in cervix 21
   1.8 HR HPV and Cervical Cancer Development 28
   1.9 Genetic and epigenetic profile of High Risk HPV during CaCx development 39
   1.10 High Risk HPV in Circulating Tumor Cells (CTC): Prognostic implications 46

C. Scope of the study 49
Chapter 2: Analysis of prevalence and susceptibility to HR HPV infection in uterine cervix of normal women and CaCx patients from India 51-96

2.1 Introduction 52
2.2 Objective 56

2.2A Determination of HPV prevalence in uterine cervix of normal women population and CaCx patients from India 57-69

2.2A.1 Materials and Methods 57
2.2A.2 Results 65

2.2B Analysis of association with HLA-DQB1*03 and IL-1β -511 polymorphisms for persistent HPV16/18 infection and development of CaCx in Indian women. 70-96

2.2B.1 Materials and Methods 70
2.2B.2 Results 86

2.3 Discussion 92
2.4 Conclusion 96

Chapter 3: Genetic and epigenetic profile of HPV16 in asymptomatic cervical infections to malignant transformation 97-122

3.1 Introduction 98
3.2 Objective 100
3.3 Materials and Methods 100
3.4 Results 107
3.5 Discussion 119
3.6 Conclusion

Chapter 4: Genetic and epigenetic status of HPV16 in CaCx patients before and after therapy: prognostic implications

4.1 Introduction 124
4.2 Objective 126
4.3 Materials and Methods 126
4.4 Results 132
4.5 Discussion 137
4.5 Conclusion 138

Chapter 5: General Discussion 140-145
