

Acknowledgement

In my PhD thesis acknowledgement, the list of people, I need to thank is very long and I am deeply indebted to all of them. Completing the PhD degree without the active support of Mr. Goutam Roychowdhury, chairman TIG, Mr. Satyam Roychowdhury, MD, TIG, Mr. Tapan Kumar Ghosh, director TIG, and my departmental colleagues of TI, Salt Lake would not have been possible. The best and worst moments of my doctoral journey have been shared with many people. It has been a great privilege to spend several years in the Department of Computer Science and Engineering at the University of Calcutta, Kolkata, India and its members will always stay close to my heart.

My first debt of heartfelt gratitude and respect must go to my supervisor Dr. Professor Nabendu Chaki, Department of Computer Science and Engineering, University of Calcutta, Kolkata, India, for his vision, guidance, encouragement and his necessary advise to proceed through the doctoral program all through the years to complete my research work. I am extremely appreciative of the stupendous supervision of Dr. Chaki all through the course of this journey.

I would especially mention two very senior collaborators of my supervisor who have showed their blessings in the form of timely advices, suggestions and guided me to take this work forward. I owe a lot to Prof Agostino Cortesi, Universita DAIS, Universita Ca' Foscari Venezia, Italy. He has substantially contributed in developing the content of Chapter 5 of the thesis. I published two joint papers based on our collaboration. Similarly Dr. Sugata Sanyal of Tata Institute of Fundamental Research, Mumbai, India has inspired me to shape the work documented in Chapter 4 of the thesis. I co-authored a paper on Tele Health management.

Last but not the least, I extend my sincere thanks to Prof. Dr. Amlan Dasgupta of English Department of Jadavpure University and Prof. Rupa Mukherjee, HOD, English from Techno India for their active support in helping me with the language construction of the thesis.

I wish to thank my father, my uncle, and my son. Their love and motivation have been my inspiration and driving force. I owe them everything and wish I could show them just how much I love and appreciate them. This thesis would not have been possible without the co-operation, assistance and encouragement of my wife to whom I owe heartfelt Thanks. Finally, I would like to dedicate this work to my mother who left me on 31st December 2012; she has been my inspiration and guiding force all the time since inception of the research work. I hope that this work makes all of you proud.
