ACKNOWLEDGEMENT

Standing at the verge of completion of my Doctoral research, perhaps no words are sufficient to express my gratitude, sincere appreciation and praise for all those who have contributed both professionally and emotionally in this journey and helped this dissertation take its present shape. I would like to express the deepest appreciation to my esteemed guide Dr. Rupak K. Bhadra, Infectious Diseases & Immunology Division, CSIR-Indian Institute of Chemical Biology (CSIR-IICB), Kolkata, who has given me the opportunity to pursue my PhD career and giving me the freedom to think and implement my ideas. He has taught me the intricacies of research with great patience while critically analyzing the results which eventually guided me to enter a fruitful and exciting field of research. He has always encouraged me to be involved with various scientific activities out of the sphere of my research which helped me to great extent to be matured as a student of science. He has been actively involved in channelizing my focus towards the molecular characterization of the stringent response of Vibrio cholerae and his guidance has ultimately helped me to formulate my dissertation to its present status.

I am thankful to Prof. Siddhant Ray and Prof. Chitra Mandal, the past and present directors of CSIR-IICB, respectively, for granting me the privilege to continue my work in this esteemed institute.

I would also like to thank my other seniors Subhra Di, Snejana Di, Amit Di, Raghvan Da, Sanjit Di, Abhirup Da, Samiran Da, Debo chess Di, Pallab Di, Arunima Di, Wortoba Di, Supriya Di, Gunjan Da, Debup Di, Tanaya Di, Tapasshi Di, Sumana Di, Srihindas Da and George Da, and my colleagues Shreyashi, Madhuchanda, Milan, Indira, Arijit, Chirantana, Saurav, Bornita, Atul, Sangita, Arindam, Dishari, Sandip and Abhishek for their selfless encouragement and support which helped to overcome the tough times during my work.

I shall remain grateful to Pratap Da, Shib Di, Muruganandan Da and Kaladasa for their technical assistance mainly through their contributions with media preparation, autoclaving and automated DNA sequencing. The staff members of the library including Madanda, Shyamalda, Satapadi and Santanta Da have always come forward with helping hands, for which I sincerely thank them all. I am grateful to all the members and the staff of the Institute for their friendly behavior, cooperation, good wishes throughout the course of my study. Thanks to the Council of Scientific and Industrial Research, Govt. of India, for financing my scheme.

I owe my deepest gratitude to all the authors of literatures reviewed, as their work provided me information and knowledge to carry out my thesis work. I earnestly appeal them to please excuse me for using some of their illustrations with proper citation and acknowledgement in my writing for academic purpose only.

I would like to thank all the faculty in the Departments of Microbiology and Biotechnology of University of Calcutta specially Dr. Alok Sil, Dr. Sargarnay Ghosh, Prof. Dhirubajoti Chattopadhyay and Dr. Kaustav Panda and all my teachers in school, college and university who have allowed me to grow and learn with them.

This dissertation would not have been possible without the generous support, encouragement and patience of my family members especially during episodes of unwarranted turbulences in the course of this journey. I pay my sincere respect to my parents Bapi and Maa who had to sacrifice a routine life in order to accommodate my long hour at the laboratory and who have been the unequivocal pillars of strength throughout my life. Words cannot express my heartfelt gratitude for my husband Subhrakanti for his unquestioned and sustained support throughout this endeavor, which was more arduous than anticipated. Special thanks to my grandparents Dadu and Dia, all my aunts and uncles, Masihmonis and Meshomonis, my sisters and brothers mainly Gargi Di, my in-laws Baba, Mamoni, Pappu Di, Chumki Di and Apy for their encouraging attitude. I am also grateful to my bestfriend Shayanmaiti, Prashant uncle, Harsha aunty, Pranav, Nupur, Sukita, Sucheta, Priya, Anyesha, Rachita and Parna for being very supportive, especially when I missed out on social functions and parties while catering to research. Last but not the least, my heart goes out to the tiny tots in my family, Guddi, Titli, Manai, Mummaum, Rene and their squad for their sweet nothings which helped me sail through the tumultuous journey.

Finally, thank you everybody (including all the people I have mentioned above and if I have forgotten anyone else to talk about) for your help and cooperation, what made me reach this height in my career.

Dated:                      Shreya Dasgupta
