The goal was just a dot when the journey began. It was a trudging travel all through, sometimes groping into the dark, sometimes the flash of the dream; and there was the spurring desire to reach the destination, touch the target. And throughout this pilgrimage, the teaming and the interdependence went hand in hand inspiring me all the way. I am grateful to every one of the team-mates.

Words fall short of expression while I outpour my feelings of appreciation for my mentor, Professor Subrata Majumdar, who guided me from darkness to light with his unstinted support all along and patience nonpareil. Under his umbrella, meeting the grueling challenges was a pleasure. I owe him a lot for guiding me in this way of research. He could not even realize how much I learned from him. I am fortunate that I had such a person as my mentor.

I take this opportunity to record my gratitude to Professor Shibaji Raha, Director, Bose Institute, for extending the infrastructural support all through. I really enjoyed my association here, so fruitful and rich.

I am thankful to Prof. Syamal Roy (Indian Institute of Chemical Biology), Dr. Rathin Baral (Chittaranjan National Cancer Institute, Kolkata) and Dr. Anamika Bose (Chittaranjan National Cancer Institute, Kolkata) for showing their keen interest in my work.

I do express my gratefulness to Prof. Parimal C Sen, Prof. Anup K Misra, Prof. Paramesh C Sil, and Prof. Arun K. Ray of the department of Molecular Medicine, Prof. Tapan K Dutta and Prof. Sujoy K Dasgupta of the department of Microbiology, Bose Institute, for their valuable advices aplenty.

It is my pleasure to record here an earnest appreciation for the care and support I received from Dr. Suchandra Bhattacharyya Majumdar while working in laboratory.

Where going gets tough, toughs get going – the saying won’t have been proved true for me, had not Gaurav da, Parna di, Anupam da, Santanu da, Nivedita di been there who helped me a lot in my research work and I had my maiden paper published.

Mention must I make here how much I am thankful to my fellow research scholars, Saikat, Shibali, Kuntal, Bidisha, Amrita, Shabina, Satabdi, Junaid and Sweta for making things smooth for me.

I would also like to acknowledge Dr. Asok K Mukherjee for his support during my entire doctoral work. Whatever little success I may achieve, the credit should surely include the support I received from Prabal-da and Manna-da of our Laboratory.
I do owe a great deal to the Council of Scientific & Industrial Research (CSIR) and Department of Science and Technology (DST) for providing the Research Fellowship.

I am grateful to my grandparents, father and mother for their sacrifice and patience.

I am very much thankful to my brother, Satyaki, for his encouragement throughout my doctoral work.

I thank my wife, Susmita, for her unconditional and tireless support, strength, views and being with me at every step of my life.

I thank my little girl, Sarandhya, for her emotional and mental support.

I would like to thank the Bose Institute library and I extend my best wishes, gratitude and thanks to all the others who have helped me during this years.
