ACKNOWLEDGEMENT

The successful completion of my thesis was made possible by the help of many persons. It will be a pleasure to thank them for the active support and encouragement provided to me during the course of the work.

First of all, I feel most privileged to have had the opportunity to work with Prof. Siddhartha Roy, Senior Professor and Dean of Studies, Department of Biophysics, Bose Institute, Kolkata, my supervisor, a great scientist and a great person. I respect him a lot for his erudition, reasoning, immense patience and breadth of knowledge, from which I have tried to learn as much as possible. He had generally offered his time, expertise, wisdom and continuous encouragement in guiding me and mentoring me step by step through the whole research process and without his advice, this thesis would not have come into being.

My sincere thanks also go to Prof. Tapas Kumar Kundu, Jawaharlal Nehru Centre for Advanced Scientific Research (JNCASR), Bangalore, Dr. Samir Kumar Pal, S.N. Bose National Centre for Basic Sciences, Kolkata, Dr. Chitra Mandal, Dr. Suresh Kumar and Dr. Krishnananda Chattopadhyay, Indian Institute of Chemical Biology (IICB), Kolkata for their generous scientific advice and use of their laboratory facilities.

I want to thank Dr. Santu Bandyopadhyay and Dr. P. Jaisankar for their active support and co-operation. I should also mention the help from experts like Sandipda, Kalyanda, Diptenduda, and Suresh. I would like to thank all the faculty members and non-teaching staff members of our Institute, IICB, Kolkata for their constant support.

My sincere thanks also go to Dr. Saumya Dasgupta and Dr. Sujoy Roy Chowdhury for their advice and encouragement.

I would like to thank all my school teachers, college teachers and university teachers for their continuous encouragement to reach this platform.

I have great pleasure in expressing my hearty thanks to my colleagues. I feel I have had the best lab-colleagues - my first lifeline in crisis and the first to share my joys at work. To begin with there were my seniors Shampadi, Ruchiradi, Rajeshda, Suranjanadi, Soumidi, Smarajitda, Srijatadi, Amlanda from whom I learned a lot; and then Subrata da, Asitda, Paromitadi, Madhumitadi, Rakadi, Neeladrida, Abhishekda, Arunachalda, Koushikda,
Israrda, Piya, Prasenjit, Arijit, Niharul, Nayan, Basusree, Priya, Prasenjit (Jr.), Soumi, Piyas and Sayan, who were always ready to help. I am thankful to Mohanda, Jishuda, Soumik, and Rajuda for their continuous co-operation and excellent technical assistance. I also want to thank Chandanda, Ranenduda, Subrata, Sushobhan and Stephanie for their enormous co-operation.

I wish to thank my close friends Tulika and Piya for helping me to get through the difficult times and for all the emotional support, entertainment and caring they provided.

I would like to convey my heartfelt gratitude to my parents Mr. Jayanta Kumar Naiya and Mrs. Aparna Naiya, who have always encouraged me to pursue my aspirations and have stood by me unconditionally. I could never come up to this point towards thesis submission without the incessant support, inspiration and blessings of them. They've raised me, loved me, taught me and made me worthy of my contribution today - I owe it to them. I would like to thank my one and only loving brother Subhendu who always believed in me and support me to complete it. I wish to thank Baroma, Jethamani, Jethima, Mejomasima, Baromama and many of my well-wishers who have helped me in different times. This journey would have been impossible without them.

I wish to extend my sincere gratitude to my extended family, my parents-in-law Late Tripti Ranjan Mondal and Mrs. Anima Mondal for constantly encouraging me to complete my work. Without their wholehearted co-operation and support this would not have been possible.

Lastly, I am most thankful to my beloved husband Dr. Biraj Kanti Mondal, for his continued and unfailing love, support and understanding. In our last few years together, he has taught me to be focused in my work, persuasive in my plans, take failures in stride and enjoy the little successes well. It would've been a very different journey without you on my side.

Gitashri Naiya
