Contents

List of Abbreviations i

Synopsis iv

Chapter I: Introduction 1-52

- Molecular recognition 2
- System taken 4
- Gal operon 5
- S100A4/Non-muscle myosin IIA 10
- Beta-catenin mediated Wnt signaling 18
- Techniques used to study the molecular recognition 30
- References 38

Chapter II: Recognition of the factors affecting the DNA-Protein interaction in transcription 53-93

- Introduction 54
- Material and Methods 57
- Results 66
- Discussion 89
- References 92

Chapter III: Comparative study of sequence-specific recognition of DNA Sequences by a transcription factor in Gal operon 94-117

- Introduction 95
- Material and Methods 96
- Results 100
- Discussion 115
- References 117
Chapter IV: Nonmuscle Myosin IIA derived peptide: Good inhibitor in S100A4 mediated metastasis 118-151

- Introduction 119
- Material and Methods 123
- Results 131
- Discussion 148
- References 150

Chapter V: Inhibition of Beta-catenin mediated Wnt-signaling using synthetic peptides 152-180

- Introduction 153
- Material and Methods 156
- Results 165
- Discussion 178
- References 179

Publication 181
