ACKNOWLEDGEMENT

I deem it my duty to express my deep sense of gratitude to Dr. M.L. Pan, Professor of Anatomy, N.R.S. Medical College, Calcutta, my guide but for whose keen interest and constant encouragement the present work could not be accomplished.

I also take the opportunity to express my grateful thanks to Dr. N. Goswami, M.B., Ph.D., Associate Professor of Anatomy and Dr. S. Mitra, M.B., D.Phil., Reader of Anatomy, whose helpful suggestions and encouragement gave me a lot of inspiration.

I am grateful to my previous colleagues, Drs. A. Nandy, M.B.B.S., M.S. and G. Bhattacharjee, M.B.B.S., M.S., who helped me in conducting the experimental operations at the initial stages.

I must express my deep indebtedness to my colleague, Dr. S.N. Sahana, M.B.B.S., D.Phil. who showed active interest in my work all through these years and gave helpful suggestions in writing the thesis.

My sincere thanks are due to the Librarian, Royal Society of Medicine, London, and the Director, INSDOC (Indian National Scientific Documentation Centre, New Delhi) for supplying me a number of microfilms and photocopies, and also
to the local Librarians of different Scientific Institutions
in Calcutta for their special help and co-operation.

Acknowledgement is also due to Messrs M.L. Mukherjee,
B.A. and B.K. Ghose, B.Com. for taking the trouble of trans­
slating for me a number of original papers from French and
German into English and to Messrs K.R. Deb, B.Sc., B.E., A.M.I.E.,
D.P. Roy, B.E., and A. Sen Gupta, B.Com. for ungrudgingly
helping me in the statistical work; to Mr. K. Sen Gupta,
Department of Pathology; to the staff of the Department of
Medical Jurisprudence for helping me in various ways; to my
wife Mrs. Deb, B.A., B.T. for going through the final type
copies.

Last but not least, I am extremely grateful to Professor
of the Department, University College of Medicine, Calcutta
University, who ungrudgingly gave his advice whenever I was
in need of it.
