

A C K N O W L E D G E M E N T S

I take the opportunity to express my deep sense of gratitude to Dr. T. Ghosh, M.Sc., D.Phil., F.P.S.I., Director, Jute Agricultural Research Institute, Barrackpore (W.B.) for guiding me on the problem. I am also deeply indebted to him, for his constant encouragement, constructive criticisms and valuable suggestions during the course of investigation and preparation of this thesis.

My warmest thanks are also due to Dr. Bibhas R. Ray, Research Agronomist, USAID, American Embassy, New Delhi, for his helpful suggestions. Thanks are also due to Director, Botanical Survey of India, for arranging to help me to identify some of the weed specimen and to the Chief Librarian, Indian Agricultural Research Institute, New Delhi for allowing me to consult the Library.

The herbicide samples sent by different firms and Institutes and the help extended by my colleagues is gratefully acknowledged.

Finally, I wish to thank the Indian Council of Agricultural Research for providing me with all the necessary facilities.
