Acknowledgements

I take this opportunity to express my utmost gratitude and reverence to Dr. Samarendra Bhattacharya of Geological Studies Unit, Indian Statistical Institute, Calcutta, for suggesting me the specific problem. His guidance, overall supervision and, finally the spent out time were of immense help for me to successfully complete the entire work. I am also indebted to Prof. S. K. Sen of Jadavpur University, Calcutta, for giving suggestions on critical areas of the technical portion of the work. Also, his experience had helped me a lot in the field.

Also, it is great privilege to express my sincere thanks to all of the faculty members and staffs of the Geological Studies Unit, Indian Statistical Institute, Calcutta, for their overall co-operation and all-round encouragement. Special gratefulness are due to Head, Geological Studies Unit, Indian Statistical Institute and Director, Indian Statistical Institute for providing me the necessary infrastructural facilities. Moreover, I am also grateful to Dean of Studies, Indian Statistical Institute for providing me six years fellowship; without this aid I wouldn’t be able to complete the work.

I am also thankful to Prof. D. Mukhopadhyay and Prof. A. Sengupta of Calcutta University, Calcutta, Prof. G. S. Ghatak of Presidency College, Calcutta and Prof. S. S. Sarkar, Durgapur Government College, Durgapur, whose valuable comments and suggestions were of immense help for fine tuning of the final version of the thesis.
Words of personal appreciation are due to all of my friends and colleagues, namely, S. Ray, S. Patranabish (Deb), S. Moitra, G. Deb, S. Misra, M. K. Mukherjee and B. Datta of Geological Studies Unit, Indian Statistical Institute, Calcutta, A. Sen of M. N. Dastur and Co. and N. Dasgupta of Durgapur Government College, Durgapur, for all-round co-operation and lively discussions on several aspects of the entire work. Also, thanks is due to A. K. Das and S. Denra of Geological Studies Unit, Indian Statistical Institute, Calcutta, for drafting some of the diagrams.

I am also grateful to Head, Geology Department, Presidency College, Calcutta, for providing me laboratory facilities. Also, I wish my sincere thanks to the University Science Instrumentation Center, University of Roorkee, National Geophysical Research Institute, Hyderabad and Wadia Institute of Himalayan Geology, Dehradoon, for providing me analytical facilities. Besides, personal appreciation is due to Prof. M. Arima, Yokohama National University, Japan, and to Dr. J. W. Sheraton, Australian Geological Survey Organization, Canberra, Australia, for providing some of the analytical facilities. Also, I am grateful to T. Kar and M. L. Rengwa of Geological Studies Unit, Indian Statistical Institute, Calcutta, for preparing thin sections.

Moreover, help of the local people residing at nearby areas of the Inspection Bungalow, Jenapore, Orissa, during my six months fieldwork, are also gratefully acknowledged. Besides, special words of appreciation is due to M. Dasgupta, K. Singh, S. Das and T. Kar of Geological Studies Unit and S. S. Das of Electronics and Computer Science Unit of Indian Statistical...
Institute, Calcutta, for their help during the fieldwork. Moreover, gratefulness is also due to the Staffs and members of Repro-photography Unit of Indian Statistical Institute, Calcutta, for photocopying of the final version of the thesis.

Lastly, very special thanks are due to my parents, brothers and sister for their constant inspiration and co-operation throughout the whole period of work. Finally, it is my greatest opportunity to offer my sincere thanks to Ms. A. Pal of Geology Department, Presidency College, Calcutta, for giving me constant encouragement in the final days of completion of my thesis.
