Chapter III:

3. Deformation history  48
   3.1 Structural elements  48
   3.2 Fold geometry and interference pattern  52
   3.3 Structural analysis  53
   3.4 Tectonic trend  58
   3.5 Synopsis  59

Chapter IV:

4. General Petrology  85
   4.1 Khondalite  86
      4.1.1 Mineralogy  86
      4.1.2 Petrography  86
      4.1.3 Reaction textures  90
   4.2 Massif-type charnockite  92
      4.2.1 Mineralogy  92
      4.2.2 Petrography  92
      4.2.3 Reaction textures  95
   4.3 Enderbite  96
      4.3.1 Mineralogy  96
      4.3.2 Petrography  96
      4.3.3 Reaction textures  97
Chapter V:

5. Chemical Petrology

5.1 Analytical data
5.2 Khondalite
5.3 Granitoids
5.4 Massif-type charnockites
5.5 Enderbite
5.6 Mafic granulite
5.6.1 Hornblende rich mafic granulite
5.6.2 Two-pyroxene granulite
5.7 Patchy pyroxene-granulite
5.8 Synopsis
Chapter VI:

6. Metamorphic history
   6.1 Analytical data
   6.2 Choice of solution models
   6.3 Metamorphic records from different lithologies
      6.3.1 Khondalite
         6.3.1.1 Mineral assemblage
         6.3.1.2 Mineral reactions
         6.3.1.3 Mineral chemistry
         6.3.1.4 P-T record
      6.3.2 Hornblende rich mafic granulite
         6.3.2.1 Mineral assemblage
         6.3.2.2 Mineral reactions
         6.3.2.3 Mineral chemistry
         6.3.2.4 P-T record
      6.3.3 Two-pyroxene granulite
         6.3.3.1 Mineral assemblage
         6.3.3.2 Mineral reactions
         6.3.3.3 Mineral chemistry
         6.3.3.4 P-T record
   6.4 P-T-t path
   6.5 Synopsis

Chapter VII:

7. Origin of charnockites
   7.1 Introduction
   7.2 Status of Jenapore charnockites
   7.3 Petrogenetic model
7.4 Review of experimental results

7.5 Testing of the model
   7.5.1 Massif-type chamockites are melt? 227
   7.5.2 Hornblende rich mafic granulites are restite? 230
   7.5.3 Two-pyroxene granulites are peritectic segregation? 233
   7.5.4 Enderbites are mixture of peritectic phase segregation and melt? 234

7.6 Trace element signature
   7.6.1 Trace element distribution 235
      7.6.1.1 Chamockites vs. hornblende rich mafic granulites 240
         7.6.1.1.1 Accessory phase control 242
      7.6.1.2 Chamockites vs. two-pyroxene granulites 245
         7.6.1.2.1 Accessory phase control 246
      7.6.1.3 Chamockites vs. enderbites 247
         7.6.1.3.1 Accessory phase control 248
   7.7 Rare Earth Elements signatures 249

7.8 Synopsis 253

Chapter VIII:

8. Origin of granites
   8.1 Introduction 278
   8.2 Status of Jenapore granitoids 280
   8.3 Petrogenetic model 283
   8.4 Review of experimental results 285
   8.5 Leptynites and leucogranites are partial melts and characteristics of their source rocks. 289
   8.6 Nature of mica dehydration melting reactions 292
   8.7 P, T and fO2 condition of melting 297
8.8 Trace element signature
  8.8.1 Trace element distribution
    8.8.1.1 Accessory phase control
  8.9 Synopsis

Chapter IX:

9. Conclusion
