Words are insufficient to express my gratitude towards Dr. (Mrs) Sumita Jha, Reader, Department of Botany, University of Calcutta without whose help the completion of my thesis would have been a distant dream. I sincerely thank her for her constant guidance, support and affection.

I thank Professor Timir Baran Jha, DDPI, Bikash Bhavan, Calcutta for his valuable advice, suggestions, and encouragement during my thesis phase. I thank Dr. S B Mahato, Dr. N P Sahoo, Dr. S Sen, Dr. D N Guha Bakshi & Dr A Ghorai for helping me in understanding several important concepts regarding my research work.

I am grateful to Dr. M J C Rhodes, Norwich, U.K for Agrobacterium strains, Dr. D Tepfer, I.N.R.A., Versailles, France for Agropine assay and Professor A B Ray, Department of Medicinal Chemistry, I.M.S. [Benaras Hindu University] for standard samples of withanolides.

I thank Professor S C Ray, Programme Co-ordinator, Centre of Advanced Study, Department of Botany, Calcutta University and Professor P K Sircar, Head of the Department of Botany, Calcutta University for allowing me to use all the facilities.

Thanks are due to the Director of the Indian Institute of Chemical Biology, Jadavpur, Calcutta and the Director of the Indian Institute of Technology, Kharagpur for allowing me to use their facilities for chemical analysis.

I acknowledge the efforts and blessings of my teachers during my school and college life without which I wouldn't have reached this far.

Dr. B Ghosh, Dr. G Gangopadhyay, Dr. S Mukherjee and Dr S Das were my companions during my research work, I acknowledge their valuable suggestion and guidance.

Finally, I need to express my appreciation to my family members who were a constant source of inspiration. I thank in particular my husband Arindam Mukherjee for his patience in bearing with me, helping me in computers and motivating me in tiding over the most difficult of times.

Swagata Ray
