Acknowledgements

First of all I bow my head to record my sincere gratitude and heart felt regard to my mentor and a soul of rare genius Prof. (Dr.) A.K. Ganguly, Sir Nilratan Sirkar, Professor, Ex-Dean, Post graduate faculty, Calcutta University, Ex-Head of the Department of Physiology and recipient of coveted Dr. B.C. Roy National Award (1995) for his fatherly guidance, unstinted assistance, boundless enthusiasm and constant inspiration. I shall always cherish and treasure in the inner cockles of my heart his near-encyclopaedic knowledge of the subject, and the expertise ease with which he dealt the onerous task of proof reading of large chunks of manuscript of the thesis. Words alone cannot fathom the depth of my indebtedness to him, without whom the task of completing the thesis would have not come to fruition.

It gives me a great pleasure to express my gratitude to the post graduate teachers of University College of Medicine (UCM) for their timely suggestion and co-operation. I express my appreciation to Late Dr. Chandan Roy Chowdhury, Ex-Head of the Department of Physiology, Late Dr. Basudev Dutta Chowdhury, Dr. Mrinal Das and Late Dr. Manoranjan Goswami for their eveready willingness to come up for help when I needed them. I am immensely grateful to Dr. Salil Kumar Mondal for his constant inspiration and practical suggestion from time to time.

I express my sincere thanks to Dr. Sasanka Chakraborty, Professor of Biochemistry for his timely suggestion and guidance for the biochemical analysis. I also owe thanks to Dr. Biswajit Mukherjee, Professor of S.N. Pradhan Centre for Neurosciences for sustained inspiration and words of support.

Dr. (Mrs.) Ratna Chanda, Ex-Research Associate of Department of Physiology, UCM deserves special mention to stand beside me to offer help with a broad grin, whenever I needed her, from time to time.
I extend heart felt gratitude to all my post graduate teachers at Calcutta University for their help at the moment of dire need.

I pay my humble regard to Dr. Laxmi Narayan Maity, Professor, Department of Medicine, Institute of Post graduate Ayurvedic Education and Research for his active help and co-operation during the collection of herbal extracts and blood samples from the patients of outdoor Patient Department of S.P.V.P. Hospital, for biochemical analysis.

I am deeply indebted to my colleagues, staff of the Department of Physiology and all other research scholars of UCM for extending the generous help during the accomplishment of my thesis work.

I am immensely grateful to Mr. Subhrajyoti Bose who curtailed his other assignments and had to burn midnight oil to type my thesis.

I express my deepest gratitude to my ailing mother Mrs. Sharifannessa Hossain, who kept track of my progress during thesis writing. I am equally grateful to my elder brother Dr. Mohammed Hossain, Chief Medical Consultant, UNICEF, for being a fountain head of encouragement and untiring support during my period of thesis work.

Finally, it would be a crime if I fail to mention the name of my spouse Mrs. Rezwana Hossain. I apologize to my wife for depriving her of several thousand hours of family association while writing the thesis. I shall always remember the steadfast help and continuous co-operation extended by her during thesis writing.
