ACKNOWLEDGEMENTS

This work has been carried out under the supervision of Dr. Timir Ranjan Sarbadhikari of the Department of Geology, Presidency College, Calcutta, to whom the writer expressed his respectful gratitude. The writer also acknowledges his indebtedness to Dr. B. K. Samanta, Department of Geology, Calcutta University, who supervised the M.Sc. thesis work of the writer in 1966 and who has also co-operated in this work.

The writer records his thanks to Prof. Dr. C.W. Drooger of University of Utrecht for reprints and advice on references; to Prof. Dr. H. J. McGillavry of University of Amsterdam for his type-description of Spiroclineus tidoenganensis and other references related to this form; to Dr. K. Mitra and Dr. S. Baksi of Jadavpur University, Calcutta, for some helpful discussions; to Dr. P.K. Ganguli of Presidency College, Calcutta, for taking some of the microphotographs; to Dr. A.K. Banerjee, Head of the Department of Geology, Presidency College, Calcutta, for allowing the writer to work in the Laboratory of that Department.
