ACKNOWLEDGEMENTS

I take this opportunity to express my sincere gratitude to my research supervisor, Dr. Arunabha Basumajumdar, Reader, Department of Chemical Technology of the University of Calcutta, India for suggesting me this interesting problem. He guided me at each stage of my work. His valuable guidance and support made it possible for me to undertake this thesis work successfully and with his understanding and considerate nature, he made the working under him easy and possible in a congenial atmosphere.

I must express my deep gratitude to Prof N. K. Mitra, Department of Chemical Technology, Calcutta University, whose constructive criticisms and fruitful advice helped me a great deal. This work could not have come to the present shape without his active support.

I wish to extend my sincere gratitude to Prof M. K. Chatterjee, Prof P. K. Das Poddar, Dr. T. K. Parya, Department of Chemical Technology, Calcutta University, for their guidance and constant encouragement throughout my work.

My grateful thanks are to Dr. A. K. Chakrabarti, Scientist, Dr. B. K. Karmakar, Scientist, Mr. P. Kundu, Scientist, Central Glass and Ceramic Research Institute, Calcutta for extending a helping hand and valuable guidance to carry out experimentations whenever needed.

My grateful thanks are to Mr. Sauryya Bhattacharya and Mr. Tapan Kumar Pal, Research Scholars, Department of Chemical Technology, Calcutta University for their whole hearted cooperation and ready help whenever needed.

I wish to take this opportunity to express my sincere thanks to Mr. S. V. Mohta, Chairman, S. V. M. Tea and Industries Ltd, for his kind support and constant encouragement for the completion of this work.

I am indebted also to my parents who brought me up with meticulous care and affection to shape my future.

Lastly I am also grateful to my wife and sons for their constant encouragement and moral support during the entire span of this work.

Udayan Mukhopadhyay
