othschild, A.M. (1966)

Histamine release by basic compounds, In: 'Handbook of Experimental Pharmacology, 1966; vol. 18: Part - I.

Serotonin agonists and antagonists in experimental hypertension.

Studies on isolated mast cells from guineapig, dog, calf and man.

Agents and Actions, 8 : 407.

Mast cells: function and contents.

Current opinion in Immunology. 6 : 91.

In "Theory and Practice of histotechnology".

St. Louis, USA.

Serotonin: Metabolism in the normal and hypertensive vessels.

Heparin lowers the blood pressure in hypertensive rats. 
Hypertension, 4:631.

Oral treatment with low molecular weight heparin normalizes blood pressure in hypertensive rats. 
Artery, 21:1.
