Table of Contents

CHAPTER 1

1.1 Introduction. 1
1.2 Potential Energy Surface of Methane 5
  1.3 Stabilisation of Planar Tetracoordinate Carbon 7
    1.3.1 Stabilization of Planar Tetracoordinate Carbon
        Based on Strain Concepts 8
    1.3.2 Stabilization of Planar Tetracoordinate Carbon
        Based on Bonding Principles 11
    1.3.3 Stabilization of Planar Tetracoordinate Carbon
        by Introduction of Small Ring Systems 14

CHAPTER 2

2.1 Introduction 22
2.2 Ab initio methods 23
  2.2.1 Basis Sets 28
2.3 Electron Correlation Methods 31

CHAPTER 3

3.1 Introduction 34
3.2 Computational details 38
3.3 Results and Discussion 39
  3.3.1 Tetrasubstituted methanes 40
  3.3.2 Spirocyclic systems involving two π donors
       and π acceptors 47
3.4 Conclusions 79
