ACKNOWLEDGEMENT

I acknowledge with pleasure the inspiring and stimulating guidance of Prof. G. Bandyopadhyay. Prof Bandyopadhyay initiated research work in my life and it would have been very difficult for me to start my research career, had he not accepted me as his student few years back. Without his help the present work would never have completed.

I thank Prof. J.R. Rao and Dr. R.N. Tiwari for helpful discussions and suggestions. Prof. Rao took keen interest in my work from the beginning. I spent many hours with Prof. Rao for discussions and his valuable suggestions certainly improve the final presentation of the thesis. Inspite of all preoccupations he always managed time for me whenever I wanted it. He was a source of inspiration to me. I am extremely grateful to him. I am also thankful to Dr. R. Sarkar for help of various types including helpful conversations. I also thank Dr. A.R. Roy for hospitality. I must confess that without Dr. Roy's active cooperation, continuation of my research work would have been impossible. Finally, I thank Mr. B.B. Banerjee for efficient and speedy typing.

Rabindranath Chattopadhyay
