ACKNOWLEDGMENT

I express here my deep sense of gratitude to Professor B. S. Basak for providing all facilities in his laboratory at Presidency College, Calcutta to carry out the research work and also for his able guidance. I would also like to extend my hearty thanks to Dr. A. K. Saha and Dr. Kamal Nandi of the Geology Department, Presidency College for their help in connection with the measurement of refractive indices of the compounds studied. My gratitude also goes to Mr. Debashis Mukherjee of the Chemistry Department for his discussions on Molecular Orbital Theory and for allowing the use of his SCF-MO programme.

I am highly indebted to Dr. F. R. Ahmed for making available crystallographic programs for the IBM 1620 and to the Department of Nuclear Physics, Bhabha Atomic Research Centre, Bombay in general and Dr. (Mrs.) S. Srikanta in particular for generosity shown in making available CDC 3600 modifications of ORFIS, ORFFE, FORDAP and RIGBODY programs at the advanced stage of the work.

I would also like to express the note of appreciation for the patience shown by Mr. M. K. Basak for typing the thesis, Mr. Bholanath Paul for drawing the diagrams. I am highly obliged to all my friends and colleagues who rendered sincere and unfailing help in various ways during the progress of this work and to make the preparation of the thesis possible.
Finally, I would like to record my indebtedness to the authorities of the Research Training Scholarship Scheme of the Government of India, New Delhi and Government of West Bengal, Calcutta for research scholarship and monetary help that enabled the work to be carried out.

Deb Kumar Sen

Department of Physics
Presidency College
Calcutta-12.
