**CHAPTER - 1**

- **GENERAL INTRODUCTION**  
  1

1.1 **INTRODUCTORY REMARKS**  
  2

1.2 **SOME PRELIMINARIES CONCERNING THE ELECTRONIC STRUCTURE AND PHOTOPHYSICAL PROCESSES IN CARBONYL MOLECULES**  
  14

1.2.1 **Electronic structure of the carbonyl group**  
  14

1.2.2 **Photon emission and absorption processes**  
  17

1.2.3 **Polarization of molecular electronic transitions**  
  22

1.2.4 **Electronic vibrational interaction and the molecular electronic spectra**  
  26

1.2.5 **Spin-orbit interaction and spin forbidden transitions**  
  32

1.2.6 **Nonradiative electronic relaxation in excited molecular systems**  
  37

1.2.7 **Solvent effect on the molecular electronic transitions**  
  43
### Chapter 2

#### Experimental Methods

#### 2. APPARATUS AND EXPERIMENTAL PROCEDURES

- 2.1 Absorption Measurements
  - 2.1.1 Absorption spectra                                             | 59   |
  - 2.1.2 Excitation spectra                                             | 61   |
- 2.2 Emission Spectroscopy
  - 2.2.1 Luminescence spectra                                          | 63   |
  - 2.2.2 Polarization spectra: The method of photoselection             | 65   |
  - 2.2.3 Phosphorescence lifetimes                                     | 67   |
  - 2.2.4 Quantum yields                                                | 68   |
  - 2.2.5 Triplet yield determination:
    - The biacetyl method                                               | 69   |
- 2.3 Sample and solvent purification                                   | 72   |

CHAPTER - 3

A COMPARATIVE STUDY OF THE ELECTRONIC ABSORPTION AND THE LUMINESCENCE PROPERTIES OF ALKAYL – ARYL AND ALKAYL – PYRIDYL KETONES; ACETOPHENONE, p-METHYL ACETOPHENONE AND 2-, 3- AND 4- ACETYLPYRIDINES

3.1 INTRODUCTION

3.1.1 Materials and experimental procedures

3.2 RESULTS

3.2.1 Absorption studies

3.2.2 Emission studies

3.3 DISCUSSION

3.3.1 Characterization of the phosphorescent states

3.3.2 Effects of ring methyl substitution on the spectral properties of aromatic ketones

3.3.4 Effects of intermolecular H-bonding on the spectral properties of aromatic ketones

3.4 CONCLUSIONS
