Acknowledgements ......................................................... i

Chapter I Introduction ................................................. 1

1.1 Aphasia: An Introduction
   1.1.1 Concepts & Definitions: An overview
1.2 Assessment of the Morphological Impairments
   1.2.1 Morphological Representation
1.3 The area of investigation of the present work
1.4 Organization of the chapters

Chapter II Review of Literature ................................. 9

2.1 Morphological representation and processing
2.2 Morphological Deficit Studies
   2.2.1 Morphology, agrammatism and paragrammatism
   2.2.2 Syntax and Morphology
2.3 Single Case Studies and Underlying Principles
2.4 Single and Double Dissociations
2.5 Aphasia Batteries: Relevance debate
   2.5.1 A brief overview
   2.5.2 Relevance of the batteries(?)
   2.5.3 Goals of the present research and aphasia batteries

Chapter III Methodology ............................................. 40

3.1 Multiple Single Case Studies
3.2 Method of Dissociations
3.3 About the Place of Work
3.4 Criteria for the selection of the cases
   3.4.1 Inclusion Criteria
3.4.2 Exclusion Criteria
3.5 Points considered during data elicitation
3.6 Aims and Objectives
   3.6.1 Area of Investigation
   3.6.2 Two-step Data Elicitation
3.7 The Extended Linguistic Tests
   3.7.1 Description
   3.7.2 Distribution in words
      3.7.2.1 Inflected words
      3.7.2.2 Derived Words
   3.7.3 Distribution in sentences
3.8 Analyzing Procedures

Chapter IV Observation & Data analysis ........................ 51

4.1 Case 1
   4.1.0 Introduction
   4.1.1 Clinical Tests
   4.1.2 Case description and the Data
   4.1.3 Data Analysis
   4.1.4 Findings
4.2 Case 2
   4.2.0 Introduction
   4.2.1 Clinical Tests
   4.2.2 Case description and the Data
   4.2.3 Data Analysis
      4.2.3.1 On words repetition tasks
      4.2.3.2 On sentence repetition tasks
   4.2.4 Findings
4.3 Case 3
   4.3.0 Introduction
   4.3.1 Clinical Tests
   4.3.2 Case description and the Data
   4.3.3 Data Analysis
      4.3.3.1 On word repetition tasks
      4.3.3.2 On sentence repetition tasks
   4.3.4 Findings
### Chapter V Discussion .............................................. 97

5.1 Case 1: RK
   5.1.1 Dissociations
   5.1.2 Implications

5.2 Case 2: OPS
   5.2.1 Dissociations
   5.2.2 Implications

5.3 Case 3: DKJ
   5.3.1 Dissociations
   5.3.2 Implications

5.4 Agrammatism and autonomous morpheme representation

5.5 The nature of morphology
   5.5.1 The nature of morphological processing

### Chapter VI Summary & Conclusion .............................. 129

### Bibliography ...................................................... 131

### Appendix: Sample Tests ......................................... 155

A. Initial Screening Test
   A.1 Sample of sentences
   A.2 Sample of words
      A.2.1 Nouns
      A.2.2 Adjectives

B. The Extended Tests
   B.1 Words
      B.1.1 Inflected Words
         B.1.1.1 Sample of Inflected Nouns
         B.1.1.2 Sample of Inflected Adjectives
      B.1.2 Derived Words
         B.1.2.1 Sample of Derived Nouns
         B.1.2.2 Sample of Derived Adjectives
   B.2 Sentences
      B.2.1 Word classes in the sentences and their distribution
         B.2.1.1 Distribution of different inflections on the word class of verbs
         B.2.1.2 Sample of sentences
