ACKNOWLEDGEMENT

I owe a profound sense of gratitude and indebtedness to Dr. Amarnath Banerjee, Reader, Head of the Department of Plastics and Rubber Technology, University Colleges of Science and Technology, University of Calcutta, for his excellent guidance and inspiring encouragement throughout the course of investigation.

I would like to express my deepest sense of gratitude to Dr. Soumen Chakraborty, Manager, Application Research and Development, Rubber division, ICI (I) Ltd., Rishra, Hooghly, W. Bengal, for his valuable suggestions and untiring indulgence to complete this research work.

I record my sincere gratitude to Mr. S.B. Ganguly, Senior Vice-President, Chloride Industries Ltd., Calcutta, for his heart-feeling inspiration and advices of great consequence to initiate this study.

I record my indebtedness to Prof. P. Ghosh and Prof. P.K. Sengupta of Department of Plastics and Rubber Technology, University of Calcutta, for their keen interest and encouragement. This dissertation would remain incomplete without conveying my gratitude to Mr. M. Mukherjee, Mr. G. Basu, Mr. S.P. Biswas, Mr. D. Ghosh and Mr. S. Sengupta of Chloride Industries Ltd., Shyamnagar, W. Bengal, and Mr. P.K. Som, Mr. S. Chattopadhyay and Mr. T.K. Maji of Department of Plastics and Rubber Technology, University Colleges of Science and Technology, University of Calcutta, without whose generous cooperation this work would not have been possible.

It gives me great pleasure to express my deep appreciation to my wife, Amita, and my son, Satyaki, for their constant cooperation and painstaking enthusiasm.

My thanks are due to the Head of the Department of Plastics & Rubber
Technology, University Colleges of Science and Technology, University of Calcutta, for providing laboratory facilities.

Finally, I intend to express my thanks to Ms. Ruby Das for typing.

Department of Plastics and Rubber Technology, University of Calcutta, April, 1991
