CONTENTS

Chapter I: INTRODUCTION

Areas studied .... 1
Previous work .... 2
Scope of the present work .... 5
Methods applied in the course of present study .... 7
Acknowledgement .... 12

Chapter II: STRUCTURE AND STRATIGRAPHY OF THE SHEAR ZONE ROCKS:

A. General geology .... 14
B. Metamorphism .... 19
C. Structure .... 21

Introduction
Structural elements
I Sedimentary structures
II Tectonic structures
1. Planar structures
   a) Axial plane schistosity
   b) Strain slip cleavage

2. Linear structures
   a) Intersection of $S_1$ and $S_2$
   b) Minor fold axes
   c) Mineral Linations
   d) Pressure shadows
   e) Striations and grooves
   f) Stretched pebbles

3. Faults

4. Joints

Structural analysis
Structural synthesis
Comparison with adjoining areas
Relation of mineral formation with deformation.

D. Stratigraphy .... 42

Chapter III: PETROLOGY OF FELDSPATHIC SCHISTS AND GRANITES FROM THE SOUTH-EASTERN PART OF THE SHEAR ZONE.

Introduction .... 49
A. Feldspathic rocks of the surface

- Petrographic description of feldspathic rocks
- Quantitative mineralogical composition
- Nomenclature of feldspathic rocks
- Compositional variation
- Chemical characters of the feldspathic rocks

B. Feldspathic rocks from the underground

- Petrographic description
- Quantitative mineralogical composition
- Nomenclature of the feldspathic rocks
- Compositional variation
- Statistical analysis of the modal data
- Chemical characters of the rocks of the underground

Chapter IV: PETROLOGY OF FELDSPATIC SCHISTS AND GRANITES FROM THE WESTERN PART OF THE SHEAR ZONE

<table>
<thead>
<tr>
<th>Introduction</th>
<th>Nature and extent</th>
<th>Petrographic characters</th>
<th>Compositional variation</th>
<th>Nomenclature of the feldspathic rocks</th>
<th>Chemical characters of the feldspathic rocks</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
<td></td>
<td></td>
<td></td>
<td>92</td>
</tr>
</tbody>
</table>

Chapter V: PETROLOGY OF 'ARKASONI GRANOPHYRES' AND ASSOCIATED FELDSPATIC ROCKS

<table>
<thead>
<tr>
<th>Introduction</th>
<th>Mode of occurrence</th>
<th>Petrological characters</th>
<th>Metamorphic characters</th>
<th>Mineralogical and chemical composition</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Chapter VI: STUDY OF PLAGIOCLASE TWINS FROM THE FELDSPATIC ROCKS OF THE SHEAR ZONE

<table>
<thead>
<tr>
<th>Introduction</th>
<th>Description of different twin types</th>
<th>Lamellar twins, Chessboard-twins</th>
<th>Carlsbad twins</th>
<th>Bavano twins</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>

Chapter VII: ORIGIN OF SODA-GRANITES, 'ARKASONI GRANOPHYRES' AND ASSOCIATED FELDSPATIC ROCKS

| Introduction |  |
|--------------|  |
Chapter VIII: STUDY OF ORE MINERALS ASSOCIATED WITH FELDSPATIC ROCKS

Introduction
Ore localities and mode of occurrence
a) Apatite-magnetite ore deposits
b) Copper-sulphide ore deposits
c) Uraniferous ore deposits

Ore microscopic description

a) Apatite-magnetite assemblage
b) Copper-sulphide assemblage

Mineralogy
Texture
Paragenesis

Relation of ore minerals to gangue minerals.

Chapter IX: GENESIS OF ORE MINERALS AND THEIR RELATIONSHIP TO FELDSPATHISATION.

Introduction
Origin of apatite-magnetite veins
Origin of uraniumiferous minerals
Origin of copper sulphides

APPENDIX
Appendix Table 1-VII
