List of papers published.

1. Analysis of covariance in two-way classification with disproportionate cell frequencies. 

2. Missing plots and a Randomised block design with balanced incompleteness. 

3. On parametric relations in B.I.B designs. 

4. Latin squares with several missing plots. 

5. Missing plots in partially balanced and other incomplete block designs. 

6. Analysis of covariance in incomplete block designs with or without missing plots. 

7. Generalised balanced designs. 

8. Bio-assays with non-orthogonal data. 

10. On missing and mixed up plot techniques. (With P. N. Bhargava). 

14. Fractional replicates as asymmetrical factorial designs. 
15. Construction of rotatable designs through a modified form of factorial designs.  

17. Sequential third order rotatable designs up to eleven factors. (With P. J. Thaker).  

19. Construction of rotatable designs through balanced incomplete block design. (With V. L. Narasimham).  

20. On the construction of second order rotatable designs through balanced incomplete block design with unequal block sizes.
