Acknowledgements

At this momentous juncture of my life, I take the opportunity to express heart-felt gratitude to the people whose help, support and encouragement has made it possible.

First of all I revere the able guidance and unlimited encouragement of my supervisor Dr. R. K. Jain. His invaluable thoughts, illustrious ideas, constructive criticism and magnificent energy inculcated a scientific attitude in me. I am deeply obliged to him for his care, patience and affection that helped me navigate through the thick and thin of these five years.

I also wish to express my deep appreciation to our Director Dr. Amit Ghosh for providing state-of-the-art facilities essentially required for the success of this study.

My sincere thanks go to Dr. Jan Roelof van der Meer, EAWAG, Dubendorf, Switzerland for his spontaneous and generous help during my stay at EAWAG under Indo Swiss Collaboration in Biotechnology Program. I am also grateful to Dr. Tapan Chakrabarti, Dr. K. L. Dixit, Dr. Rup Lal, Dr. G. S. Prasad, Dr. Swaranjit Singh and Mr. Mayilraj for their timely help and unconditional support.

A word of heart-felt thanks is extended to my fellow researchers Debarati, Anuradha, Narinder, Sumeet, Manisha, Deepak, Rakhi, Pooja and Jai for their support and resourcefulness. I highly acknowledge their help in all my endeavors within the laboratory or otherwise. I also admire and appreciate the able assistance provided by the lab staff especially the technical help provided by Ashok, Dhan, Simran, Nikhil, Abhineet, Rajbir and Rameshji.

I also take this opportunity to express my gratitude for my friends Sourav, Vibhu, Arshad and Cheeku who have made my stay in IMTECH a memorable and wonderful experience. I am also indebted to those who have selflessly stood by me and encouraged me and patiently tolerated my momentary eccentric moods.

Above all, I feel elevated in thanking about my mother, sister and Rinkz for their love, affection and moral support during my research career; without their understanding and encouragement this would not have been possible.

Financial support during the course of this study from CSIR, New Delhi, and ICSB is thankfully acknowledged.

Gunjan
