ACKNOWLEDGEMENT

This work was taken by me as a Ph.D. Research Programme in the Calcutta University under the supervision of Prof. H.R. Betal, Calcutta University.

I express my gratitude to my supervisor Prof. H.R. Betal, who has been a constant source of information and guidance to me in matters associated with final interpretation of data and in writing the thesis. It would not have been possible for me to complete the work without his guidance.

It is impossible to acknowledge in a personal manner the contributions made to this work by the many people with whom I had contacted during this period. In a general manner, I am grateful to the authors and publishers of the publications which I freely consulted in the course of writing my thesis.

I am grateful to many organisations and personalities, individual and corporate, without the help of whom the work would have been impossible. I deem it a duty to acknowledge the help I received from various authorities like the Census of India, National Atlas and Thematic Mapping Organisation, National Informatic Centre, the Bureau of Applied Economics and Statistics, District Industrial Centre, Directorate of Agriculture, Forest Department, Public Works Department and different Banks in West Bengal.

Finally, a special word of thanks goes to my sister, mother, teachers and friends for their help, encouragement and inspiration during the course of period.
