ACKNOWLEDGEMENT

The various aspects of the study on rural hospital system in West Bengal embodied in this thesis have been made possible due to the active and most valuable guidance of Dr. S. C. Seal, M.B., D.P.H., Ph.D., F.N.I., F.A.P.H.A. (Hon.), Emeritus Medical Scientist, Indian Council of Medical Research, and formerly Professor of Epidemiology, All India Institute of Hygiene and Public Health, Calcutta, who took personal and active interest all throughout the investigation and preparation of this thesis. The author is highly indebted to him and is taking this opportunity to express his grateful thanks.

Thanks are also due to Dr. C.L. Mukherjee, M.B., M.O., Ph.D., F.R.C.O.G., Ex-Director of Health Services, Government of West Bengal for his personal interest in this study and for kindly sanctioning the necessary study leave for the purpose and making the hospitals and their staff and the State Bureau of Health Intelligence to offer all cooperation in collecting the necessary data. The author is also grateful to Professor D.K. Sanyal, M.A., O.B.E., Director, Indian Institute of Social Welfare and Business Management, Calcutta, for permitting Dr. S.C. Seal, the then Professor of Public Health and Head of the Department of General Social Welfare of the Institute to act as a guide for the thesis work and for providing the facilities for computational work.
He is also thankful to the Medical Officers and other staff of the rural hospitals selected for study for their cooperation and help in the collection of data. The author also received the desirable cooperation of the local public in giving him the information required.
