## CONTENTS

### Chapter 1:
- 1.1) General Introduction
- 1.2) Objective of the present work
- 1.3) Literature survey

### Chapter 2: INVESTIGATION ON THE LOCATION OF NEUTRAL ECG POTENTIAL POINT
- 2.1) Introduction
- 2.2) The proposed model.
  - 2.2.1) Postulates
  - 2.2.2) Equivalent circuit
  - 2.2.3) Analysis
- 2.3) Experimental study and analysis of the result
  - 2.3.1) Experiment
  - 2.3.2) Digitization of ECG waves
  - 2.3.3) Frequency plane transformation
  - 2.3.4) Analyzed results
- 2.4) Discussion

### Chapter 3: INVESTIGATION ON NONLINEAR PROPERTIES OF BIOELECTRODES
- 3.1.1) Introduction
- 3.1.2) Electrode electrolyte interface
- 3.1.3) Present investigation
- 3.2) Design of incremental linear electrical bridge.
  - 3.2.1) Theory of nonlinearity analysis of polarization impedance.
  - 3.2.2) Design consideration of the bridge network.
