

LIST OF PUBLICATION OF RESEARCH PAPERS

- Susanta K. Dey, Jyotirmoy Kusari and Asoke C. Ghose (1983). Detergent induced enhancement of antibody mediated flagellar agglutination of Vibrio cholerae. **International Research Communication System : Medical Science**, 11, 908.
- Susanta K. Dey (1984). Detergent induced agglutination test to identify Vibrio cholerae non-O1 strains by any one serotype of Vibrio cholerae non-O1 antisera. **IRCS Medical Science**, 12, 826-827.
- Susanta K. Dey, Syamal K. Raha, Samir K. Roy and S.L. Chakrabarty (1988). Comparison of L-asparaginase activity in different species of Vibrio. **Indian Journal of Medical Research**, 88, 398-403.
- Susanta K. Dey, Syamal K. Raha, Samir K. Roy and S.L. Chakrabarty (1988). Activity and stability of Vibrio cholerae L-asparaginase. **Medical Science Research**, 16, 689-690.
- Susanta K. Dey, Syamal K. Raha, Samir K. Roy and Sankarlal Chakrabarty (1990). Perspective of biosynthesis and acclivity of L-asparaginase between two different toxigenic strains of Vibrio cholerae. **Current Microbiology**, 50, In press.
- Samir K. Roy, Syamal K. Raha, Susanta K. Dey and S.L. Chakrabarty (1988). Induction and catabolite repression of B-glucosidase synthesis in Myceliophthora thermophila D-14 (= ATCC 48104). **Applied and Environmental Microbiology**, 54, 2152-2153.
- Samir K. Roy, Syamal K. Raha, Susanta K. Dey and S.L. Chakrabarty (1989). Immobilization of B-glucosidase from Myceliophthora thermophila D-14. **Enzyme and Microbiol Technology**, 11, 431-435.
- Samir K. Roy, Syamal K. Raha, Susanta K. Dey and S.L. Chakrabarty (1990). Effect of temperature shift on the production and location of cellulase complex by Myceliophthora thermophila D-14. **Enzyme and Microbiol Technology**, In press.
