

ACKNOWLEDGEMENT

My grateful thanks first and foremost to my Lord and redeemer Jesus Christ, Light of the world. I thank my lord for enable me to fulfill this great task. I was weak and not capable; by your grace I can overcome every thing. I love you and honor your holy name.

This is my Privilege to work in Biophotonics with light in medicine. Today's relevant clinical challenge is the early diagnosis of cancer. Especially Indian contexts the high prevalence of oral cancer mortality gives that much importance in its early detection. I really enjoyed the research work as a PhD student at the Centre for Earth Science Studies, Trivandrum. This work with out have been possible to perform with the support and encouragement of many people. I take this opportunity to express my warm gratitude to all of them.

*I convey my heartfelt thank to my guide, **Dr. N. Subhash**, Scientist F& Head ASD CESS, Trivandrum for his excellent guidance during this time. His perpetual encouragement and enthusiasm helped me in my research. In addition, he is always accessible and willing to help. As a result, research life became smooth and rewarding me. I am truly grateful to him for his scientific excellence, constant support and warm friendship. I could not have imagined having a better advisor and mentor for my PhD study. I convey my thanks to his beloved family also.*

I would like to express my deep and sincere gratitude to Dr. V.T. Beena, Professor & Head, Department of Oral and maxillo facial pathology, Government Dental College Trivandrum, whose encouragement and support from the initial to the final level of the clinical trial enabled me to develop an understanding of cancer. Special gratitude to Dr. Anita Balan, Professor and Head of the Department of Oral Medicine and Radiology she was very much helpful during the clinical studies her advice and encouragements are great.

During this work I have collaborated with many colleagues for whom I have great thanks, and I wish to extend my warmest greetings to all those who have helped me with my work in the Department of Oral and maxillo facial pathology, Government Dental College Trivandrum. In particularly Dr. Manju Stephen, and Dr. Philip E Kolady, collaborators, whose support was valuable in medical field, which was unfamiliar to me. They have given their valuable time and occasion to me to fulfill the target. Their valuable advice and friendly help, their extensive discussions around my work and interesting explorations in operations have been very helpful for this clinical research.

In my daily work I have been blessed with a friendly and cheerful group of fellow students Mr. Prasanth C S, who deserves special mention, his help was highly valuable and worth without which this work would not have completed smoothly. I am grateful to him for his invaluable support given

throughout the research period. Miss. Nisha G Unni gave her full support during the clinical trials and I really thank her. Dr. Rupananda Mallia and Dr. Shiny Sara Thomas, my seniors, they have supported me a lot in the beginning of my Ph D work. A special thanks to Miss. Dhanya research student RAD who is my room mate who helped me lot. Her help was unavoidable. Mr. K V Baiju, Lecturer Department of statistics, S N College Chempazhanthu, deserves special thanks, who supported me in the data analysis part. This dissertation would not have been possible without the guidance and the help of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study.

Besides my advisor, I would like to thank the rest of my ethical committee of Dental College, Director, Centre for Earth Science Studies.

I thank my beloved family for supporting me throughout all my studies. My parents deserve special mention for their insuperable support and prayer. My beloved Father, Mother, sister and family, showing me joy and intellectual pursuit ever since I was child. Sincerely raised I with their caring gently love. Special thanking for all my church fellows and prayer partners. Without their encouragement and understanding it would have been impossible for me to finish this work. Special thanks to JJ, who was with me in the most difficult situation during this time.

Finally, I would thank every body who was important to the successful realization of thesis. As well as expressing my apology that I could not mention personally one by one.

Jayanthi J. L.

CESS, Thiruvananthapuram
