

# LIST OF TABLES

1.1	Classification of Liquid crystals	4
1.2	Molecular arrangements and ordering in liquid crystalline phases	13
3.3.1	Phase transition temperatures ( $^{\circ}\text{C}$ ) of 3ccp-ff, 3ccp-fff and related compounds	72
3.3.2	Table of significant data. Values in columns (6-13) are at $80^{\circ}\text{C}$	78
4.3.1	Important Crystallographic data and refinement parameters of 3ccp-ff and 3ccp-fff	100
4.3.2	Fractional co-ordinates and equivalent isotropic thermal parameters of 3ccp-ff and 3ccp-fff	102
4.3.3	Bond lengths ( $\text{\AA}$ ) of the non-Hydrogen atoms with standard deviations in parentheses	103
4.3.4	Bond angles ( $^{\circ}$ ) involving non-Hydrogen atoms with standard deviations in parentheses	104
4.3.5	Selected intermolecular short contact distances less than $4.0 \text{\AA}$ for 3ccp-ff	108
4.3.6	Selected intermolecular short contact distances less than $4.0 \text{\AA}$ for 3ccp-fff	108
4.4.1	Important Crystallographic data and refinement parameters of 11CHBT	113
4.4.2	Fractional co-ordinates and equivalent isotropic thermal parameters of the non-Hydrogen atoms of 11CHBT	114
4.4.3	Bond lengths ( $\text{\AA}$ ) of the non-Hydrogen atoms with standard deviations of 11CHBT	114
4.4.4	Bond angles ( $^{\circ}$ ) involving non-Hydrogen atoms with standard deviations of 11CHBT	115
4.4.5	Selected intermolecular short contact distances less than $4.0 \text{\AA}$ of 11CHBT	118
4.5.1	Important Crystallographic data and refinement parameters of 7CBB	121
4.5.2	Fractional co-ordinates and equivalent isotropic thermal parameters of the non-Hydrogen atoms of 7CBB	122
4.5.3	Anisotropic thermal parameters of the Non-Hydrogen atoms of 7CBB	123
4.5.4	Bond lengths ( $\text{\AA}$ ) of the non-Hydrogen atoms with standard deviations of 7CBB	124
4.5.5	Bond angles ( $^{\circ}$ ) involving non-Hydrogen atoms with standard deviations of 7CBB	125
4.5.6	Comparison of selected bond lengths ( $\text{\AA}$ ) and bond angles ( $^{\circ}$ ) in 6CBB and 7CBB	126
4.5.7	Selected intermolecular short contact distances less than $2.7 \text{\AA}$ of 7CBB	128
5.3.1	Molecular structure and transition temperatures	137
6.2.1	Transition temperatures and thermal stabilities of different phases of the hosts, dopants and mixtures	153
6.2.2	Spontaneous polarization of the mixtures at room temperature ( $20^{\circ}\text{C}$ )	156
6.2.3	Critical frequencies of the <i>Goldstone mode</i> in the mixtures at room temperature	161
