

ACKNOWLEDGEMENTS

The thesis presented here is the outcome of help, co-operation and support of several persons. I place on record my sincere gratitude to the special individuals mentioned here.

Dr. Thri vikramaji, K. P, formerly Professor and Head of the Department of Geology, University of Kerala supervised the research work. His scholastic guidance and academic experience have all along been very helpful to me during the period of research. His valuable suggestions and meticulous scrutiny have enhanced the quality of this manuscript.

Dr. S. Anirudhan, Professor and Head of the Department of Geology, University of Kerala gave academic and administrative support to me. Dr. P.T. Roy Chacko, formerly Reader, Department of Geology, University of Kerala is thanked for his concern and continuous encouragement. Encouraging words of Dr. P.K. Rajendran Nair, formerly Professor and Head of the Department of Geology and Dr. V. Prasannakumar, Professor, Department of Geology, University of Kerala were often a morale booster.

The Director of Collegiate Education, Government of Kerala granted me the necessary permission and leave for research. The University Grants Commission supported me with Junior Research Fellowship in the initial phase and later with Teacher Fellowship (under FIP). Chemical analysis was done in the GSI, Thiruvananthapuram, point counting in the CESS, Thiruvananthapuram and XRDA in the WIHG, Dehradun. I am grateful to the staff of these organizations.

My limited vocabulary is inadequate to record my gratitude to Dr. Sabu Joseph, Assistant Professor, Department of Environmental Sciences, University of Kerala. His constant support, encouragement and personal involvement has helped me immensely, especially in the last phase of finalisation of the thesis. Thanks are due to his family also for their hospitality and consideration.

I am grateful to Prof. M. Rama Sarma for the gentle prod, support and encouragement during the course of the research. Dr. V. Radhakrishnan with his computing agility has assisted me in times of need. Thanks are also due to Dr. S. N. Kumar, Dr. Udayakumar J., Dr. Biju Longhinos (and his students), Dr. P.K. Sabu, Dr.

Biju Sebastian and my colleagues in the Department of Geology, Government College, Kottayam, for supportive gesture of various sorts during the course of research. I thank Prof. James Thyagarajan (Tirunelveli) for his hospitality and help during field work in Tamil Nadu.

Computational help received from Mr. Jayadevan K., Mr. Praveen K.R. and Mr. Ajith Mohan, formerly research scholars in the Department of Geology, University of Kerala is acknowledged. Help received from Mr. Jobin Thomas, Mr. Vishnuprasad M.R, and Mr. Vinod Gopal V., Research Scholars in the Department of Environmental Sciences, University of Kerala is gratefully acknowledged.

The prayerful support of quite a few of my in-laws, relatives and friends kept me moving forward during the course of research, especially at the final stages. The list is too long, but special mention is due to Sr. Flowery Maris, Apostolic Oblates Convent, Kottayam, Dr. George Philip, Wadia Institute of Himalayan Geology, Dehradun and Prof. George Mathew, Kottayam for their concern and prayerful moral support.

My parents, if alive, would have been the happiest persons to see the thesis in this form.

Last but not least I am extremely grateful to my wife Smt. Magie and children Noel, Nesta and Nigil who gave me the essential moral and emotional support to complete the research work.

My gratefulness to the Almighty God, whose mercy and grace sustained me throughout, stands atop all aforesaid notes of gratitude and appreciation.

Benno Joseph
