Abstract		
Preface		
List of tables		
List of figures		
Appendices		
a. List of abbreviation		
b. Thesis related publications		
1. General introduction and review of literature		
1.1 Introduction		1
1.2 Objectives		3
1.3 Review of the literature		
1.3.1. Structure and classification of petroleum		4
1.3.2. Recent scenario of petroleum spills and its hazardous effect		5
1.3.3. Remediation processes		7
1.3.4. Factors involved in petroleum hydrocarbon degradation		10
1.3.5. Microorganisms involved in petroleum hydrocarbon degradation		16
1.3.6. Metabolism of petroleum hydrocarbon		20
1.3.7. Microbial physiological response to petroleum hydrocarbon		29
1.3.8. Recent advances in petroleum degradation		31
1.3.9. Application of petroleum degrading microorganism for biodiesel production		37
1.4 Bibliography		39
2. Degradation of petroleum hydrocarbon by isolated bacterial cells		
2.1 Introduction		48
2.2 Materials and Methods		
2.2.1. Isolation of petroleum hydrocarbon degrading microorganisms from soil sample		50
2.2.2. Screening of the best petroleum hydrocarbon degrading microbial strain		50
2.2.3. Phenotypic and Biochemical characterization of the selected bacterial strain		50
2.2.4. Antibigram of the selected bacterial strain		51

2.2.5. Phylogenetic characterization of the selected bacterial strain	
2.2.5.1. <i>Isolation of genomic DNA</i>	51
2.2.5.2. <i>Agarose gel electrophoresis of isolated DNA</i>	51
2.2.5.3. <i>PCR amplification of 16S rRNA and its sequence analysis</i>	52
2.2.6. Determination of growth and dry cell mass of PS11 strain	52
2.2.7. Tolerance of PS11 cells to other solvents	52
2.2.8. Transmission electron microscopy (TEM) of PS11 in presence of petroleum hydrocarbon:	53
2.2.9. Determination of membrane fatty acid adaptive profile in presence of petroleum hydrocarbons	54
2.2.9.1. <i>Growth conditions</i>	
2.2.9.2. <i>Extraction of bacterial membrane lipid</i>	
2.2.9.3. <i>Phospholipid analysis</i>	
2.2.9.4. <i>Analysis of fatty acid composition by gas chromatography</i>	
2.2.10. Detection of total petroleum hydrocarbons (TPH) and some individual petroleum hydrocarbon degradation by Gas Chromatography (GC)	55
2.2.11. Characterization of the gene responsible for petroleum hydrocarbon degradation.	
2.2.11.1. <i>Isolation of plasmid DNA and its Restriction digestion</i>	55
2.2.11.2. <i>Curing of plasmid DNA</i>	56
2.2.11.3. <i>Growth of plasmid cured and wild PS11 strain in presence of petroleum hydrocarbon</i>	56
2.2.11.4. <i>Preparation of competent E. coli JM109</i>	57
2.2.11.5. <i>Transformation of plasmid in JM109 and screening of transformed cells</i>	57
2.2.11.6. <i>Degradation of Total petroleum hydrocarbons (TPH) and some individual petroleum hydrocarbon by transformed JM109 cells</i>	58
2.2.11.7. <i>PCR amplification and sequencing of plasmid borne gene responsible for degradation</i>	58

2.3

Results

2.3.1. Isolation of petroleum hydrocarbon degrading microbial strain	60
2.3.2. Screening of best petroleum hydrocarbon degrading microbial strain	60
2.3.3 Biochemical and phylogenetic characterization of the selected strain	62
2.3.4 Determination of growth and dry cell mass of <i>G. stearothermophilus</i> PS11	65
2.3.5 Tolerance property of <i>G. stearothermophilus</i> PS11 to other solvents	66

2.3.6	Transmission electron microscopy(TEM) analysis of <i>G. stearotherophilus</i> PS11 in presence of petrol	67
2.3.7	Determination of membrane fatty acid adaptive profile in presence of petroleum hydrocarbons	
2.3.7.1.	<i>Phospholipid analysis</i>	68
2.3.7.2.	<i>Analysis of fatty acid composition</i>	69
2.3.8.	Detection of Total petroleum hydrocarbons (TPH) and some individual petroleum hydrocarbon degradation by gaschromatography (GC)	71
2.3.9.	Characterization of the gene responsible for petroleum hydrocarbon degradation.	
2.3.9.1.	<i>Isolation of plasmid DNA and restriction digestion profile</i>	73
2.3.9.2.	<i>Curing of plasmid DNA</i>	73
2.3.9.3.	<i>Growth of plasmid cured strain and wild type strain in presence of petroleum hydrocarbon</i>	74
2.3.9.4.	<i>Transformation of plasmid in JM109 and screening of transformed cell</i>	75
2.3.9.5.	<i>Degradation of Total petroleum hydrocarbons (TPH) and some individual petroleum hydrocarbon by transformed JM109 cells</i>	76
2.3.9.6.	<i>PCR amplification and sequencing of plasmid borne gene responsible for degradation</i>	77
2.3.9.7.	<i>Sequence comparison of C23O with other extradiol dioxygenases</i>	79
2.4	Discussion	80
2.5	Bibliography	88
3.	Application of PS11 cells for biodiesel production	
3.1	Introduction	92
3.2	Materials and Methods	
3.2.1	Determination of lipase production by PS 11	94
3.2.2	Production media, enzyme preparation and measurement of bacterial growth	94
3.2.3	Lipase assay	94
3.2.4	Optimization of PS11 lipase production by OVAT method	95
3.2.5	Purification of PS11 lipase and determination of	95

	molecular weight	
	3.2.6 Characterization of purified PS11 lipase	
	3.2.6.1. <i>Effect of pH on activity and stability of PS11 lipase</i>	96
	3.2.6.2. <i>Effect of temperature on activity and stability of PS11 lipase</i>	96
	3.2.6.3. <i>Effect of metal ions and chemicals on PS 11 lipase activity</i>	96
	3.2.6.4. <i>Effect of detergents on lipase stability</i>	96
	3.2.6.5 <i>Effect of organic solvent on lipase stability</i>	97
	3.2.7 Application of lipase PS11 in biodiesel production	
	3.2.7.1. <i>Sample preparation</i>	97
	3.2.7.2. <i>Determination of biodiesel production by TLC method</i>	97
	3.2.7.3. <i>Determination of biodiesel production by gas chromatography</i>	98
3.3	Results	
	3.3.1 Kinetics of lipase production by <i>Geobacillus stearothermophilus</i> PS11	99
	3.3.2 Optimization of PS11 lipase production by OVAT method	99
	3.3.3 Purification of PS11 lipase and determination of molecular weight	100
	3.3.4 Effect of pH and temperature on activity and stability of PS11 lipase	102
	3.3.5 Effect of metal ions and chemical reagents on PS 11 lipase activity	103
	3.3.6 Effect of detergents on lipase stability \	103
	3.3.7 Effect of solvents on lipase stability	104
	3.3.8 Application of lipase PS11 in biodiesel production	
	3.3.8.1. <i>Determination of biodiesel production by TLC method</i>	105
	3.3.8.2. <i>Determination of biodiesel production by GC method</i>	106
3.4	Discussion	108
3.5	Bibliography	114
3.6	Conclusion	118
