Abstract x

1 Introduction 1

2 The Nonlinear Schrodinger equation and sources 7
  2.1 The nonlinear Schrodinger equation 8
  2.2 The solutions of NLSE in terms of Jacobi elliptic functions 11
  2.3 The NLSE equation with a source 12
  2.4 Solitary wave solutions of the NLSE with a source 15
    2.4.1 General solutions 15
    2.4.2 Special solutions 17
  2.5 Numerical results 20
  2.6 NLSE in opaque medium with distributed coefficients and an external source 23
  2.7 The rational solutions 25
  2.8 Numerical results 29

3 Compactons 34
  3.1 Introduction 34
  3.2 Some rational solutions of MKdV equation 37
    3.2.1 Numerical results 39
  3.3 Periodic rational solutions of Boussinesq equation 41
  3.4 Compactons of MKdV equation with a source 42
3.5 Compactons of NLSE with source. ................................. 44

4 Two-species Bose-Einstein Condensate 48
4.1 Introduction ......................................................... 48
4.2 Bose-Einstein condensation ........................................ 50
4.3 Single-component BEC. ............................................ 50
4.4 Two-component BEC. ............................................... 54
4.5 Exact solutions. ...................................................... 58
4.6 Numerical results. ................................................... 64

5 Models for disoriented chiral condensates 69
5.1 Equilibrium and non-equilibrium pictures ...................... 69
5.2 Boost invariant solutions. ......................................... 73
5.3 DCC and sine-Gordon equation. .................................. 74
5.4 Traveling wave solutions of $O(4)$ sigma model. ............... 78

6 Conclusions 82

Appendix 85
