ACKNOWLEDGEMENTS

Life is full of vicissitudes and few people are fortunate to have strong hand at their back. I owe this strength to my research supervisor Dr. R. P. Tripathi, Assistant Director, Division of Medicinal Chemistry, Central Drug Research Institute, Lucknow, for his able guidance, invaluable supports, constructive criticism, sapient suggestions, incessant help, parental affection and understanding which led to successful completion of my research work.

My sincere thanks are due to Dr. C.M. Gupta, Director, CDRI, not only for providing the necessary library and others facilities but also for the teach me in JNU PhD class. Thanks are due to Dr. D. K. kulshreshtha, Ex. Head, Dr. S Ray, Ex. Head and Dr. C. Singh, Head, Medicinal Chemistry Division, CDRI for providing me the necessary facilities and suggestions during the entire period of my work. I am also thankful to Dr. K. P. Madhusudan, Head, and all the staff of S.A.I.F., CDRI, Lucknow for providing the spectral and analytical data. In particular I am thankful to Dr. R. Roy, not for only providing NMR data but also for helpful discussions at the time of need.

The biological screening results were provided by Drs. B. S. Srivastava, A. Srivastava, V. Chaturvedi, R. Srivastava, K. K. Srivastava, Scientist, microbiology division and Drs. A. K. Srivastava, J. K. Saxena, S. Sinha, A. Gaikwad, Scientist, Biochemistry division, and Dr. P. K. Shukla, Scientist, Medical Mycology division, CDRI. I acknowledge them for their inputs and cooperation.

I also thank to Dr. A. K. Dwivedi, Scientist, Pharmaceutics division for his help during the quality assessment and purity determination of my synthesized compounds.

I would like to thank my labmates Diksha, Neetu, Shyam Sunder and Namarta for their timely help and maintaining a work culture in the lab. I am highly thankful to my respected seniors Dr. A. R. Khan, Mr. Rahul Tripathi and R. K. Grover who have been source of inspiration during this work. Technical assistance by Mr. V. K. Maurya is acknowledged. My special thanks to my dear friend Mr. R. C. Mishra who has never hesitated in helping me and I will never forget his cordial and friendly companionship and light moments, that I shared with him.
It gives me immense pleasure to express my deep sense of gratitude to Drs Atul Kumar, S. K. Singh, B. Kundu, Scientist, CDRI and Dr. Y. Singh, U. P. College, Varanasi for their constant encouragement and affectionate behavior, which was always been a source of inspiration.

I don’t have the words to express the gratitude to my parents, Swati, Bittu, Raman and other family members whose passion for perfection has inspired me in tirelessly striving for a lucid presentation of this work. I also acknowledge affectionate behavior of my madam Mrs. Prema Tiwari that supported for the successful completion of my Ph.D. work. Words are insufficient to express my feeling to Mr. Ashok K. Mishra and Mrs. Jyotsna Dwivedi whose friendship always been a source of inspiration.

Financially assistance by Council of Scientific and Industrial Research, New Delhi is greatfully acknowledged.

Vinod Kumar Tiwari
